Weidmüller

# Orange Selection

## Quick and easy planning

As a planning engineer, do you want to select products easily and receive them quickly? From a partner you can rely on? Then plan with the Orange Selection from Weidmüller in the future. The Orange Selection items are always available, carefully selected and the portfolio consists of more than 1,500 items to fully cover your standard needs.

If your order is placed before 3:00 pm, we guarantee that your order will be on its way the very next working day.

For even more efficient planning and production processes, we will of course provide all articles in digital form. CAD, ETIM and eClass data are available in our online product catalogue **catalog.weidmueller.com**

We have summarised all the advantages of the Orange Selection on our website.

Check it out: **www.weidmueller.com/orange-selection**

# Wiring close to the application

## RockStar® always offers the right connection technology

SNAP IN

PUSH IN

### Spring connection with SNAP IN technology

The innovative SNAP IN technology is revolutionizing control cabinet construction. The direct plugging of flexible conductors without a wire end ferrule thereby reduces conductor preparation
and wiring.

**Connection principle:**

- Significant acceleration of installation and maintenance processes in the field.
- Tool-free, material- and time-saving, as crimping on ferrules is no longer necessary
- Simply insert the flexible stranded conductor into the open connection point until it „clicks“
- Secure connection that reliably withstands even strong impacts and vibrations

**Field of application:**

Wherever flexible conductors without ferrules are used, SNAP IN technology offers the decisive handling advantage. Especially in industries with an increased volume of signal cables.

### Spring connection with PUSH IN technology

The PUSH IN spring connection with direct plug-in technology enables the fastest wiring process: The stripped or prepared conductor is simply inserted into the clamping point as far as it will go - and that‘s it. Operating the release lever is only necessary for highly flexible stranded wires or to release the connection. The stainless steel spring guarantees a high contact force of the conductor on the tinned copper busbar. An enclosing stainless steel cage prevents settling in the contact area. Supporting the clamping force on plastic parts was deliberately omitted.

**Connection principle:**

- Convenient, vibration-proof and gas-tight connection.
- Fine-stranded conductors with crimped-on ferrules, solid conductors or ultrasonically welded conductors simply inserted into the clamping point as far as it will go
- Spring and conductor stop ensure optimum connection conditions and guidance of the screwdriver to release the conductor.

**Field of application:**

The standard connector for applications in the field where fast wiring in combination with small dimensions is required and intuitive use is an advantage. Also in environmental conditions with strong vibration.

## Spring connection with tension spring technology

The pretensioned tension spring made of high-quality stainless and acid-resistant steel pulls the conductor against the galvanized copper busbar, creating a permanently good vibration-resistant connection. The spring is opened by means of a screwdriver. The conductor is pushed into the spring cage via the conductor insertion funnel. The conductor is clamped by removing the screwdriver. Low contact resistance and high corrosion resistance are achieved by the surface-treated busbar.

**Connection principle:**

- Low contact resistance and high corrosion resistance.
- Tension spring made of high-quality, rust- and acid-resistant steel pulls the conductor against the tinned copper busbar
- Insensitive to vibrations and high conductor pull-out forces

**Field of application:**

For fast wiring with constant conductor clamping force, even in ambient conditions with strong vibration.

## Screw connection

The simple handling makes the screw connection the universal screwed connection solution for all conductor types.

**Connection principle:**

- The screw connection is the best known connection technology worldwide
- The built-in wire protection spring protects the conductor from damage
- Screw terminals are being replaced by PushIn terminals in many places

**Field of application:**

For fast wiring with constant conductor clamping force, even in ambient conditions with strong vibration.

# Wiring close to the application

## RockStar® always offers the right connection technology.

### TOP screw termination with pull effect

Whereas with the classic screw connection the screw is always arranged at right angles to the conductor outlet direction, the TOP connection allows operation from the conductor direction. The TOP connection thus enables the greatest possible packing density in the connection area. The „pull effect" ensures that when the conductor is connected, it is pulled into the clamping point and makes secure contact.

**Connection principle:**

- Parallelism of conductor entry and screw actuation: Simple wiring, for example, with small lateral distances in installation boxes.
- The conductor is pressed directly against the busbar via the hardened steel pressure clip
- The high contact force guarantees a gas-tight connection.

**Field of application:**

Housing designs or mounting conditions such as PCB inserts that do not allow right-angle screw actuation due to space constraints.

### Crimp connection

The crimp connection technology was implemented in order to provide a cost-effective option for pre-assembly of connectors, even in very large quantities. The crimp contacts can therefore be terminated not only with hand tools, but also in very high quantities on the automatic crimping machine in production. The contacts then only have to be snapped into the housings provided. This connection technology meets the high requirements in railroad technology.

**Connection principle:**

- Fast, fully automated pre-assembly of connectors possible
- Durable, form-fit connection technology
- Low contact resistance
- Conductor connection is extremely resistant to temperature fluctuations and vibration

**Field of application:**

Applications where fully automated and factory-oriented processing steps are to be combined with field wiring. Also in environmental conditions with temperature fluctuations and strong vibration.

## Axial screw connection

This connection technology combines the advantages of screw and crimp connections. The stripped conductors are pushed axially into the contact. From the opposite side, a hexagon socket screw is turned axially into the conductor. The connection unit is space-saving and easy to handle. This technique is commonly used for larger cross-sections where space is limited at the same time. Conventional screw or tension clamp connections would be too large in these cases. The result is easy-to-assemble contacts with the same installation space as crimp contacts, but where, in contrast to crimp technology, the conductors can also be disconnected and reconnected without having to use a new contact.

**Connection principle:**

- Low space requirement of the contact
- Easy handling: tool and conductor are kept in line during assembly
- Three steps for a secure connection: strip conductor, insert stranded wire into contact chamber, screw on contact

**Field of application:**

Applications wherever multi-core conductors with large cross-sections are used and simple connection technology that can also be disconnected again is required.

# Crimp contacts

Whereas the contacts for screw, axial screw, tension clamp and PUSH IN connections are already built in, you can choose the appropriate contact for a crimp connection.

The heart of a connector is its contacts. They make up the actual connection between two conductors. Two types of contacts make this possible: pins and sockets (male and female). The pin conducts the electrical current on its outer surface and is introduced into the socket, which conducts the electrical current on its inner surface. Heavy-duty connectors have copper alloy contacts and the contact surfaces are plated with gold or silver: silver improves conductivity, gold is corrosion-proof.

Crimp contacts are available in turned, solid form.

**Selection of silver or gold-plated contacts**

When using plug-in connectors under standard conditions, the resistance between the contacts has little effect. Even heavily corroded silver-coated contact pins and sockets do not exhibit any contact problems.

The situation is different where there are very small currents in extreme applications such as those in electroplating shops, tunnels or in cellulose processing. The silver oxide layer on the surface of the contacts forms an electrical resistance with capacitive, inductive and ohmic components. As a result, the original signal is distorted so much that the recipient is unable to detect it properly and interprets it incorrectly. This results in faults and indirectly, to damage to machines and processes. Gold-plated contacts should be used in such cases.

The rule of thumb is: use gold-coated contacts for currents < 5 mA and voltages of up to 5 V.

[1] Depending on the diameter of the insulation, the max. AWG wire may need to be pushed in with some force.
[2] The 2.5mm² wire must be inserted with some force.
[3] When the rated voltage is reduced to 400 V / 6 kV / 3 or with a protection degree of at least IP54.
[4] Only by tilting the screwdriver can the clamping point be opened all the way.
[5] Wire-end ferrules may be used when the rated voltage is reduced to 400 V / 6 kV / 3.
[6] When the protection degree is at least IP54, the creepage and clearance distances within the encapsulation may be rated for a lower pollution degree (DIN EN 61984). For this encapsulation, the use of wire-end ferrules is possible with 500 V / 6 kV / 3.
[7] The PZ4 crimping tool should not be used with the max. wire size.

**The connector inserts can be combined with wire-end ferrules in other ways depending on the available clamping range and the type of cable being used.**
**We would be happy to take a look at the technical feasibility of your specific application.**

| **M8 x 0.75** | **Power contacts** | | |
| | S 6/12 | 1.1 – 1.7 | SW 2 |
| | S 8/0 (+ PE) | 6 (10 – 16 mm²) / 7 (25 mm²) | SW 4 |
| **M10 x 1** | **Power contacts** | | |
| | S 4/0 (Axial connection) | 2 – 3 | SW 3 |

Increasing the tightening torque does not improve the contact resistance. The stated torque settings offer optimal mechanical, thermal and electrical conditions.
Exceeding the recommended values may even damage the conductor and terminal.

# RockStar® – Housing types

## Housing IP65 / NEMA Type 4X

The housing and the interlock mechanism on a connector protect the contacts from exterior mechanical influences (ie. shock, contamination, dust, accidental touching, moisture penetration, water and liquids such as cleaning solvents, coolants and oils). The durable RockStar® housings are produced with the highest quality standards; they provide IP65 protection and are resistant to corrosion and impacts. All housings come standard with a stainless steel interlock. A special die-cast alloy and the multi-level surface finish combine to deliver the ultimate protection against extreme conditions and ensure that the housings keep their visual appeal.

### Applications
- General mechanical engineering
- Materials handling and factory construction
- Packaging machines
- Transport and traffic engineering
- Energy technology
- Lighting and stage equipment
- Process engineering

etc.

### Features
- Tightness at least IP65 to IEC 60529
- Tightness NEMA Type 12, 4X
- Scratch-resistant, corrosion-proof, long-lasting

### Design
- Cast aluminium alloy
- Multistage surface coating
- Colour: grey, similar to RAL 9006
- 3 versions, standard, high and XXL
- 11 sizes

### Interlock system
- Clamp lock in different versions
- rustproof stainless steel

## HQ Series Housings, IP65 / NEMA Type 4X

The HQ connector series has a very compact housing with IP65 protection. It is available in either plastic or metal. The full industrial capability of these products makes them a perfect match for the main usage in materials handling applications. The HQ housing series is particularly important for connecting motor starters and frequency converters. It is also the ideal extension for setting up a decentralised power distribution system based on FieldPower®.

### Applications
- General machine construction
- Materials handling and factory construction
- Decentralised automation

etc.

### Features
- Tightness: at least IP65, acc. to IEC 60529
- Tightness: NEMA Type 12, 4X
- Complies with VDE and ISO 23570 (DESINA)
- Scratch-proof, corrosion resistant and durable

### Design
- Plastic housing: polycarbonate, glass-fibre reinforced; Colour: grey, similar to RAL 7032
- Metal housing: die-cast zinc, nickel-plated, multi-level surface coating, EMC properties
- Cable outlet is straight or angled

### Interlock system
- Clamp interlock made from rust-free stainless steel

## IP65 EMC housing

In today's industrial environment, machines, plant and devices are becoming more and more complex. At the same time, automation is also on the rise. Lots of sensors and actuators are controlled to transmit or receive sensitive signals. And what's more, reliability and availability are becoming increasingly important quality features of machines and devices. This means that they need to be optimally designed in terms of electromagnetic compatibility (EMC).

### Applications
- Machine construction
- Wind energy
- Transportation

### Features
- Labyrinth structure on the housing
- FPM seal material
- Conductive surface
- O-ring seal
- IP65 protection class acc. to 60529
- Scratch-proof, corrosion resistant and durable

### Design
- Die-cast aluminium, resistant to sea water
- Multi-level surface coating
- Colour: black, similar to RAL 9005
- Four sizes
- Cable outlet is straight or lateral

### Interlock system
- Removable clamp lock in different versions
- Clamp system made of polyamide with internal stainless steel spring

## Housing IP68

The IP68 housings have been developed for use under extreme environmental conditions. The high degree of protection (IP68 and IP69K) and the excellent resistance to vibration and shock guarantee fail-safe operation when heavy-duty connectors are used in vehicles and under tough climatic conditions. If you want to protect your delicate interfaces from EMC emissions, these connectors are the right choice for you.

### Applications
- Transport and traffic engineering
- Energy technology
- Applications with extreme protection class requirements

### Features
- Labyrinth structure on the housing
- Silicone sealing material
- Conductive surface
- O-ring seal
- Tightness IP68 / 5 bar to IEC 60529
- IP69K impermeability according to DIN 40050-9
- Scratch-proof, corrosion resistant, impact resistant and durable

### Design
- Cast aluminium alloy
- Multistage surface coating
- Optimised construction for high impact resistance and EMC
- Colour: black RAL 9005
- 5 sizes; size 8 also in XXL

### Interlock system
- Screw cap with internal/external hex drive

# RockStar® – Housing types

### Flange-mounted housing IP66

Our flange-mounted housings made of plastic have a built-in cable gland and a screw interlock. They seal directly onto the panel wall and can therefore be used without an attachment housing. The housings are impressive with their low weight and optimal protection against contamination, water and vibrations.

**Applications:**
- Machinery and plant engineering
- Automotive industry
- Panel building
- Wind power plants

**Features:**
- Impermeability IP66/67 acc. to IEC 60529
- Impermeability NEMA type 12, 4X
- Resistance against impacts acc. to DIN EN 50102
- Robust, durable, corrosion resistant

**Design**
- Plastic housing made of polyamide
- Colour: black
- Four sizes
- Cable outlet is straight or angled

**Interlock system**
- Screw connection with hexagon socket
- Material: stainless steel

# Locking systems

### One longitudinal locking clamp on housing bottom

- Manual operation – no tools required
- 2 locking points – along the longitudinal axis
- Good for lengthwise alignment
- Interlock system made from rust-free stainless steel

### One central locking clamp on housing top

- Manual operation – no tools required
- 2 locking points along the transverse axis
- Easily accessible from above where space is limited
- Made from rust-free stainless steel

### Two transverse locking clamps on housing bottom

- Manual operation – no tools required
- 4 locking points – good sealing effect
- Easily accessible when the cable inlet is in the plugging direction
- Good for aligning side by side
- Made of plastic and rust-free stainless steel

### Screw fastening

- Uses internal/external hex drive
- Most effective seal
- The two interlock points are arranged diagonally
- Easily accessible when space is tight
- Screws made from rust-free stainless steel

### Two transverse locking clamps on housing top

- Manual operation – no tools required
- 4 locking points – good sealing effect
- Easily accessible when the cable inlet is in the plugging direction
- Good for aligning side by side
- Interlock system made from rust-free stainless steel

## Design of clearances and creepage distances in electrical equipment

### General

Since April 2003, the rules of DIN EN 60664-1 / 11.03 in conjunction with DIN 61984 / 09.02 apply to the dimensioning of clearances and creepage distances.

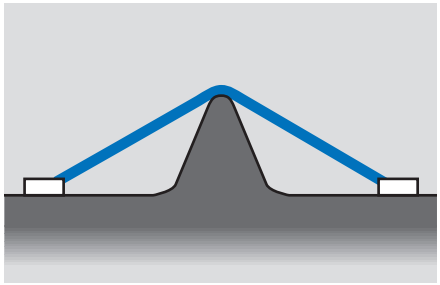
The design data resulting from these provisions is – if applicable – specified in this catalogue for each product.

For the design of clearances and creepage distances, application of the regulations for insulation coordination produces the following interrelationships:

### Clearances

Clearances are rated in accordance with the following factors:

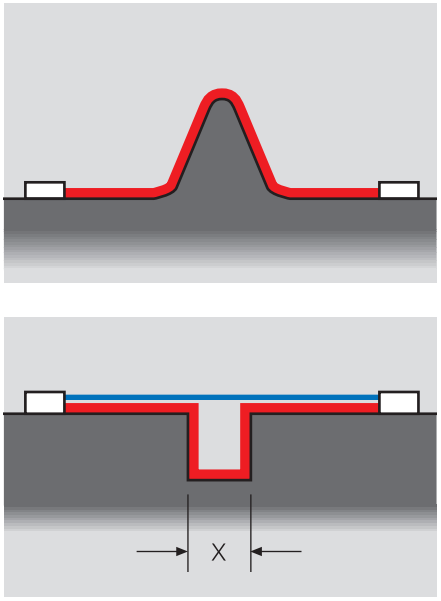
- Anticipated surge:
  **rated impulse withstand voltage**
- Used
  **surge protection precaution**
- Measures to prevent pollution:
  **pollution severity**



### Creepage distances

Creepage distances are rated in accordance with the following factors:

- Planned
  **rated voltage**
- Insulation materials used:
  **insulation group**
- Measures to prevent pollution:
  **pollution severity**



**Slots** are taken into account when measuring creepage distances if their minimum width x is dimensioned according to the following table:

| Pollution severity | Minimum width x in mm |
|---|---|
| 1 | 0.25 |
| 2 | 1.0 |
| 3 | 1.5 |
| 4 | 2.5 |

If the associated clearance in air is less than 3 mm, the minimum slot width can be reduced to ⅓ of the clearance.

**Influencing factors:**

**Rated impulse withstand voltage**
The rated impulse withstand voltage is derived from:

- **Phase-to-earth voltage** (the nominal voltage of the network, taking all networks into account)
- **Surge category**

**The surge categories** are defined in accordance with international standard DIN EN 60664-1 (for electrical equipment fed directly from the low voltage network):

**Surge category I**
Equipment that is intended to be connected to the permanent electrical installation of a building. Measures to limit transient surges to the specific level are taken outside the equipment, either in the permanent installation or between the permanent installation and the equipment.

**Surge category II**
Equipment to be connected to the permanent electrical installation of a building e.g. household appliances, portable tools and similar loads.

**Surge category III**
Equipment that is part of the permanent electrical installation and other equipment where a higher degree of availability is expected e.g. distribution boards, circuit-breakers, wiring systems (IEV 826-06-01, including cables, busbars, junction boxes, switches, power sockets) in the permanent installation, and equipment for industrial use and some other equipment, e.g. stationary motors with permanent connections to the permanent installation.

**Surge category IV**
Equiment for use at or in the proximity of the incoming supply point of the electrical installations of buildings upstream of the main distribution board e.g. electricity meters, circuit-breakers and ripple control units.

**Pollution severity categories:**

**Pollution severity category 1**
No pollution, or only dry, non-conductive pollution that has no influence.

**Pollution severity category 2**
Non-conductive pollution only; occasional condensation may cause temporary conductivity.

**Pollution severity category 3**
Conductive pollution, or dry, non-conductive pollution that is liable to be rendered conductive through condensation.

**Pollution severity category 4**
Contamination results in constant conductivity, e.g. caused by conductive dust, rain or snow.

The dimensioning of clearances and creepage distances, and hence the rating data for electromechanical products (terminals, terminal strips, PCB terminals and plug-in connectors) is based on pollution severity 3 and surge category III, taking account of all network types.

**Table 1: Three-phase 4 or 3-conductor a.c. systems**

| Nominal voltage of power supply systems | For conductor-cond. insulat. | For conductor-earth isolation | |

# Electrical data

## Design of clearances and creepage distances in electrical equipment, influencing factors:

### Rated voltage

The rated voltage is derived from the nominal voltage of the power supply and the corresponding network type.

**Single-phase**
**2- or 3-wire AC or DC systems**

| Rated voltage of the power supply (mains) *) | Voltages for table 4 | |
|---|---|---|
| | For insulation phase-to-phase 1) | For insulation phase-to-earth 1) |
| | All systems | 3-wire systems neutr. point earthing |
| V | V | V |
| 12.5 | 12.5 | – |
| 24/25 | 25 | – |
| 30 | 32 | – |
| 42/48/50**) | 50 | – |
| 60 | 63 | – |
| 30 – 60 | 63 | 32 |
| 100**) | 100 | – |
| 110/120 | 125 | – |
| 150**) | 160 | – |
| 220 | 250 | – |
| 110 – 220 | 250 | 125 |
| 120 – 240 | | |
| 300**) | 320 | – |
| 220 – 440 | 500 | 250 |
| 600**) | 630 | – |
| 480 – 960 | 1,000 | 500 |
| 1,000**) | 1,000 | – |

**3-phase**
**3- or 4-wire AC systems**

| Rated voltage of the power supply (mains) *) | Voltages for table 4 | | |
|---|---|---|---|
| | For insulation phase-to-phase | For insulation phase-to-earth | |
| | All systems | 3-phase 4-wire systems with earthed neutral wire 2) | 3-phase 3-wire systems unearthed 1) or phase-earthed |
| V | V | V | V |
| 60 | 63 | 32 | 63 |
| 110/120/127 | 125 | 80 | 125 |
| 150**) | 160 | – | 160 |
| 208 | 200 | 125 | 200 |
| 220/230/240 | 250 | 160 | 250 |
| 300**) | 320 | – | 320 |
| 380/400/415 | 400 | 250 | 400 |
| 440 | 500 | 250 | 500 |
| 480/500 | 500 | 320 | 500 |
| 575 | 630 | 400 | 630 |
| 600**) | 630 | – | 630 |
| 660/690 | 630 | 400 | 630 |
| 720/830 | 800 | 500 | 800 |
| 960 | 1,000 | 630 | 1,000 |
| 1,000**) | 1,000 | – | 1,000 |

1) Phase-to-earth insulation levels for unearthed or impedance-earthed systems are equal to those of phase-to-phase because the operating voltage to earth of any phase can, in practice, reach full phase-to-phase voltage. This is because the actual voltage to earth is determined by the insulation resistance and capacitive reactance of each phase to earth; thus, a low (but acceptable) insulation resistance of one phase can earth it and raise the other two to full phase-to-phase voltage to earth.
2) For electrical equipment for use in both 3-phase 4-wire and 3-phase 3-wire supplies, earthed and unearthed, use the values for 3-wire systems only.
*) It is assumed that the rated voltage of the electrical equipment is not lower than the nominal voltage of the power supply.
**) Because of the common changes, the meaning of the ** symbol has not been used in table 1; i.e. the / symbol indicates a 4-wire 3-phase distribution system. The lower value is the phase-to-neutral voltage, while the higher value is the phase-to-phase voltage. Where only one value is indicated, it refers to 3-wire 3-phase systems and specifies the value phase-to-phase. The values given in table 1 are still taken into account in tables 3a and 3b by the ** symbol.

### Insulating material

The insulating materials are subdivided into four groups according to their CTI (Comparative Tracking Index):

| Insulating material | |
|---|---|
| I | 600 ≤ CTI |
| II | 400 ≤ CTI < 600 |
| III a | 175 ≤ CTI < 400 |
| III b | 100 ≤ CTI < 175 |

The comparative tracking index must be determined according to DIN IEC 112/VDE 0303 part 1 on the basis of specially prepared samples with test solution A.

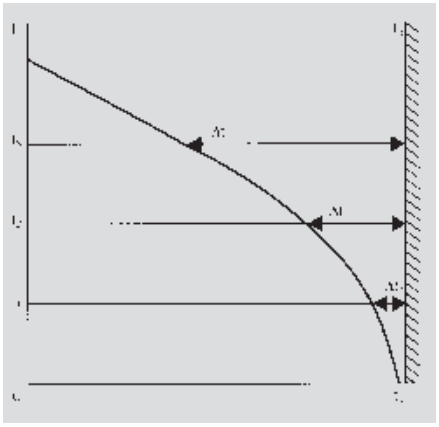
The **derating curve** shows which currents may flow continuously and simultaneously via all possible connections when the component is subjected to various ambient temperatures below its upper limit temperature.

The **upper limit temperature** of a component is the rated value determined by the materials used. The total of the ambient temperature plus the temperature rise caused by the current load (power loss at contact resistance) may not exceed the upper limit temperature of the component, otherwise it will be damaged or even completely ruined. The current-carrying capacity is hence not a constant value, but rather decreases as the component ambient temperature increases. Furthermore, the current-carrying capacity is influenced by the geometry of the component, the number of poles and the conductor(s) connected to it.

The current-carrying capacity is determined empirically according to DIN IEC 60512-3. To do this, the resulting component temperatures $t_{b1}$, $t_{b2}$ ... and the ambient temperatures $t_{u1}$, $t_{u2}$ are measured for three different currents $I_1$, $I_2$, $I_3$ ....
The values are entered on a graph with a system of linear coordinates to illustrate the relationships between the currents, the ambient temperatures and the temperature rise in the component.

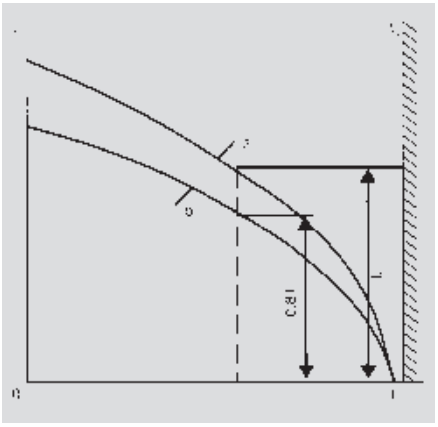
## Base curve

**upper limit temperature of component**



$t_g$ = upper limit temperature of component
$t_u$ = ambient temperature
$I_n$ = current

## Derating curve



$t_g$ = upper limit temperature of component
$t_u$ = ambient temperature
$I_n$ = current
a = Base curve
b = Reduced base curve (derating curve)

**The loading currents** are plotted on the y-axis, **the component ambient temperatures** on the x-axis. A line drawn perpendicular to the x-axis at the upper limit temperature $t_g$ of the component completes the system of coordinates. The associated average values of the temperature rise in the component, $\Delta t_1 = t_{b1} - t_{u1}$, $\Delta_{t2} = t_{b2} - t_{u2}$, ... are plotted for every current $I_1$, $I_2$, ... to the left of the perpendicular line. The points generated in this way are joined to form a roughly parabolic curve.

As it is practically impossible to choose components with the maximum permissible contact resistances for the measurements, the base curve must be reduced. Reducing the currents to 80 percent results in the **"derating curve"** in which the maximum permissible contact resistances and the measuring uncertainties in the temperature measurements are taken into account in such a way that they are suitable for practical applications, as experience has shown. If the derating curve exceeds the currents in the low ambient temperature zone, which is given by the current-carrying capacity of the conductor cross-sections to be connected, then the derating curve should be limited to the smaller current in this zone.

# Electromagnetic compatibility (EMC)

Many interfaces require the use of a connector that is EMC-compliant.

### What is meant by the phrase EMC-compliant?

Electro-magnetic compatibility (EMC) refers to the ability of electrical equipment to function satisfactorily in its electromagnetic environment without introducing intolerable electromagnetic disturbances to anything in that environment.
(DIN VDE 0870). An electrical component or electrical equipment is considered to be compatible when their emissions and sensitivity levels are within a tolerable range (i.e., when there is sufficient interference immunity).

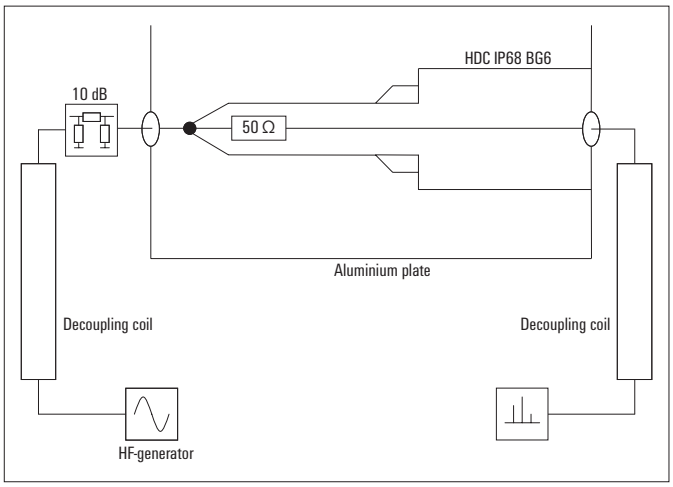
### The basics

There are several types of measurements that can be used to determine the effectiveness of a cable shield. The method used here is the KS 04 B measurement from VG 95 373-41 “Electromagnetic compatibility of devices – methods for measuring shielded cable and shielded protective cable hoses”. This method enables the quality of the shield to be evaluated. It also assesses the influence of the contact points of the shielding braid as well as the male and female plug components.
A standardised test cable with a length of one metre is used. This, and the fact that this measurement is carried out in a 50-ohm system which does not take the actual line impedance into account, leads to characteristic resonance effects. This means that this measurement process only delivers meaningful results up to a frequency of 30 to 100 MHz. It is, however, well suited for evaluating and comparing the effectiveness of various shielding and shield-contacting methods. It does not deliver an absolute value that would enable the limiting of voltages coupled in a cable, using an imposed HF electromagnetic field. The user should always consider the measurement results relative to the laboratory operational situation. Your actual, real-world shield attenuation values will normally be less than the values achieved in the lab because of different cable lengths, impedance behaviour and non-optimal earthing.

### Testing methods

The method applied does not use the normative tri-axial measuring platform, but instead uses an aluminium plate (with dimensions 500 x 380 x 10 mm). This plate serves as the test’s reference earth. HF sockets (N-standard) are mounted on two standing angular panels and are used to connect the measuring device. The flange along with the plug are mounted to one of the angular panels.

The limit value of the shield attenuation Sa is
f < 1 MHz: 60 dB
1 MHz < f < 100 MHz: 60 – 30 dB with15 dB per decreasing decade f = 100 MHz: 30 dB

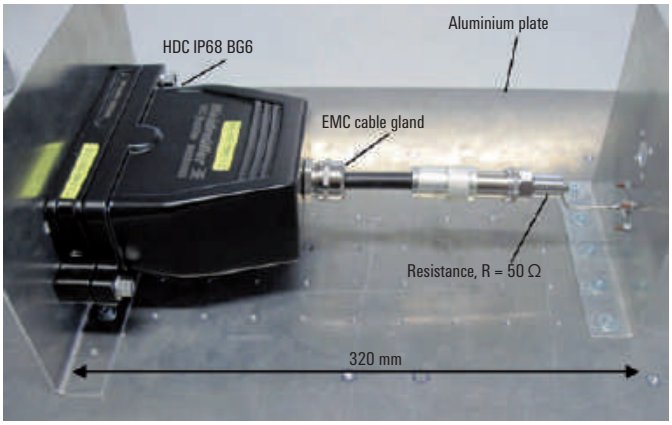


According to VG 95373-41, a frequency range up to 30 MHz is specified for the measurement process. However the range can be extended to about 100 MHz for information purposes.
The insertion loss as of the test object is determined by the relationship between the voltage on the interior wire and the supplied voltage. The VG95373-41 also refers to the insertion loss as the shield attenuation factor.
The relationship between insertion loss as and coupling resistance Zk is characterised as follows:

Insertion loss: $a_s \approx 20\ l_g\ 50\ \Omega\ /\ |\ Z_k\ |$ in dB
Coupling resistance: $Z_k \approx 50\ \Omega \times 10\ a_s / 20$ in Ω

According to VG 95373-41, this relationship has sufficient precision when $Z_k < 500$ mΩ.

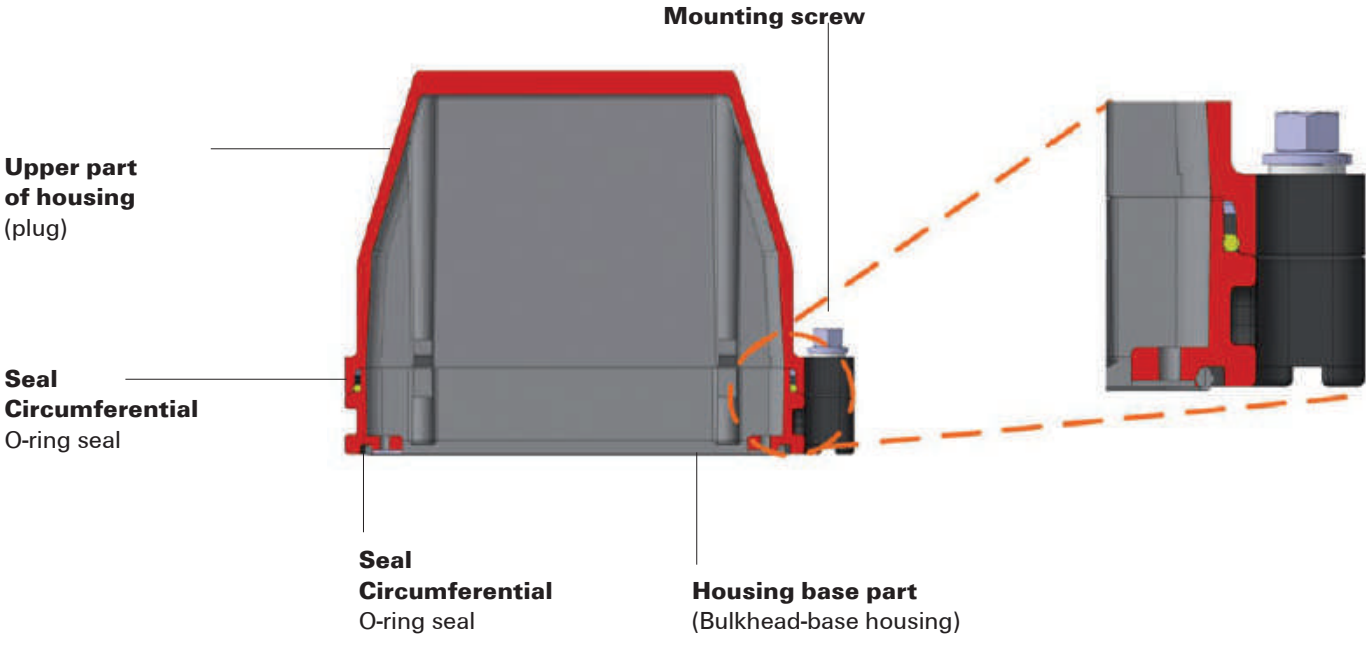
In order to test plug-in connectors, a reference shield cable is used that is separated in the middle. The cable can be connected with a corresponding connector pair and measured as described above. In order to evaluate the shield (the resistance between the cable shield and the reference earth), the connector frame and its reference earth are mounted directly to the cover of the testing equipment.



Housing must have very good EMC characteristics in order to meet these requirements.

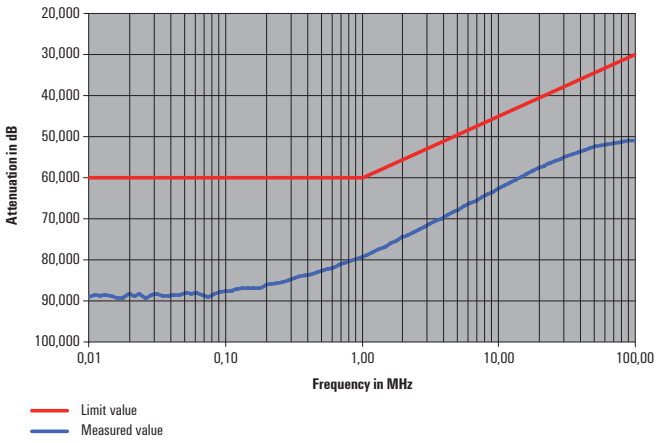
Weidmüller has designed the RockStar® IP68 housing with built-in features that ensure outstanding EMC and resistance to interference.

The bulkhead or base housing, combined with the plug housing, produces a labyrinth structure which ensures high EMC shield attenuation. In addition to providing the required EMC protection, this housing series features IP68/IP69K protection and excellent resistance to impacts and vibration. This combination of features permits the RockStar® IP68 housing to be used anywhere.



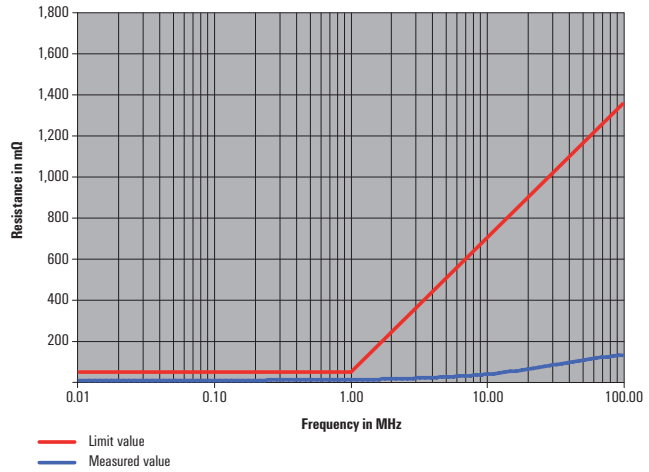
The requirements for an EMC-compliant interface stipulate that the interference immunity level or shield attenuation potential should be rated high enough so that the electromagnetic fields in the vicinity of the transmitted signals cannot exert influence within the connector. The capacity for active interference must be low enough to ensure that surrounding devices or components are not affected by interference. The following diagrams illustrate the insertion loss and the coupling impedance for the adjacent housing.

**Insertion loss**



HDC IP68 16B TSS 1M50

**Coupling impedance**



# IP classes of protection to IEC 60529

The class of protection is indicated by a code consisting of the two letters IP and two digits representing the class of protection.

Example: I P 6 5

- 2nd digit: protection from liquids
- 1st digit: protection from solid bodies

## Protection against intrusion of external particle matter (1st digit)

| Digit | | |
|---|---|---|
| 0 |  | No protection |
| 1 | | Protection against ingress of large solid bodies with diameter > 50 mm. (Protection to prevent dangerous parts being touched with the back of the hand.) |
| 2 |  | Protection against ingress of large solid bodies with diameter > 12.5 mm. (Protection to prevent dangerous parts being touched with the fingers.) |
| 3 |  | Protection against ingress of large solid bodies with diameter > 2.5 mm. (Protection to prevent dangerous parts being touched with a tool.) |
| 4 | | Protection against ingress of large solid bodies with diameter > 1 mm. (Protection to prevent dangerous parts being touched with a piece of wire.) |
| 5 | | Protection against harmful deposits of dust, which cannot enter in an amount sufficient to interfere with satisfactory operation. |
| 6 | | Complete protection against ingress of dust. |

## Protection against penetration of liquids (2nd digit)

| Digit | | |
|---|---|---|
| 0 |  | No protection |
| 1 |  | Protection against drops of condensed water falling vertically. |
| 2 |  | Protection against drops of liquid falling at an angle of 15° with respect to the vertical. |
| 3 |  | Protection against drops of liquid falling at an angle of 60° with respect to the vertical. |
| 4 | | Protection against liquids splashed from any direction. |
| 5 |  | Protection against water jets projected by a nozzle from any direction. |
| 6 |  | Protection against water from heavy sea on ships' decks. |
| 7 |  | Protection against immersion in water under defined conditions of pressure and time. |
| 8 |  | Protection against indefinite immersion in water under defined conditions of pressure (which must be agreed between manufacturer and user and must be more adverse than number 7). |

# Class of protection to NEMA

## National Electrical Manufacturers Association NEMA 250-1991

| Digit | |
|---|---|
| Typ 1 | Housing primarily for use in inside rooms. Protects from penetration of solid bodies. |
| Typ 2 | Housing primarily for use in inside rooms. Protects from penetration of solid bodies and water. |
| Typ 3 | Housing primarily for outdoor use. Protection against penetration by rainfall and dust as well as damage due to ice formation. |
| Typ 3R | Housing primarily for outdoor use. Protection against rain and snow as damage due to ice-formation. |
| Typ 3S | Housing primarily for outdoor use. Protection against rain, snow and foreign bodies. External mechanisms can be operated despite ice accumulation. |
| Typ 4 | Housing for inside and outside rooms. Protects from rain, foreign bodies, water spray and water jets as well as damage through ice formation on the outside of the housing. |
| Typ 4X | Housing for inside and outside rooms. Protects from corrosion, rain, foreign bodies, water spray and water jets as well as damage through ice formation on the outside of the housing. |
| Typ 6 | Housing for inside and outside rooms. Protects from water jets as well as penetration of water when submerged; protects from damage through ice formation on the outside of the housing. |

| Digit | |
|---|---|
| Typ 12 | Housing for use in inside rooms. Protects from dust deposits and non-corrosive dripping liquids. |
| Typ 13 | Housing for use in inside rooms. Protects from dust deposits, water spray, oil and non-corrosive coolants. |

# Chemical resistance

# Safety information and standards

**Please note the following safety information:**

- Never plug or unplug connectors under load or during operations.
- We can only guarantee the technical and electro-technical characteristics promised in this catalogue if all the components were supplied by Weidmüller.

The following standards apply in the vicinity of heavy-duty connectors:

- DIN EN 60664-1 or IEC 60664-1: Insulation coordination for equipment within low-voltage systems; principles, requirements and tests (replaces DIN VDE 0110-1)

- DIN EN 61984 or IEC 61984:
  Plug-in connectors – safety requirements and tests

- DIN EN 175301-801:
  Detail Specification: High-density rectangular plug-in connectors, round removable crimp contacts; (replaces DIN 43652)

- DIN EN 60352 or IEC 60352:
  Solderless connections

- DIN EN 60529 or IEC 60529:
  Classes of protection provided by enclosures (IP code)

- DIN VDE 0870:
  Electromagnetic influence

- DIN EN 60999-1:
  Connecting devices, safety requirements for screw terminal connections and screwless terminal connections for electrical copper conductors

- DIN 40050-9:
  Road vehicles; classes of protection (IP-code)

# RockStar® inserts

# Fixed pole RockStar® inserts
## Flexible. Compact. High performance.

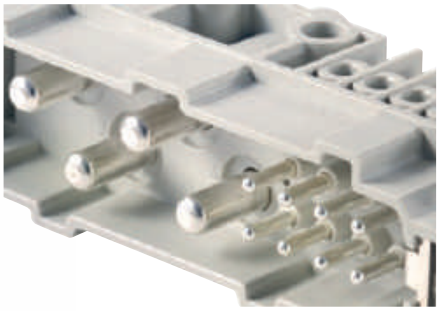
Rely on real RockStars when choosing your connectors. Our broad portfolio of heavy-duty connectors offers the right solution for all requirements for the transmission of energy, signals, and data outside the control cabinet. At the heart of our RockStar® connectors are the inserts. No matter which interface you want to implement, the nine series in up to 12 sizes ensure reliable electrical function.

The RockStar® inserts are made from glass-fibre-reinforced polycarbonate. This material is distinguished by its low water absorption and the high levels of dimensional stability made possible by the added glass fibres. So our rugged RockStar® inserts are the ideal choice for solutions of up to 216 poles and a maximum of 110 A / 1,000 V.

**Fast wiring. But safe.**
Choose from all common connection technologies including the PUSH IN direct plug-in technology and the brand new SNAP IN connection. The SNAP IN principle is particularly easy to use:: The stripped conductor is inserted directly into open connection points and the snap connection snaps into place with a click.

**Consistency**
One plastic material – with all approvals. This expands your range of choices. It also helps you to have simple documentation and reliable planning processes.

**Suitable**
Always according to your needs: including a space-saving combination of power and signals in one connector.



# HA series

Compact: Our space-saving miracle among the fixed-pole inserts accommodates up to 48 contacts in suitable IP65 housings due to its particularly slim design.

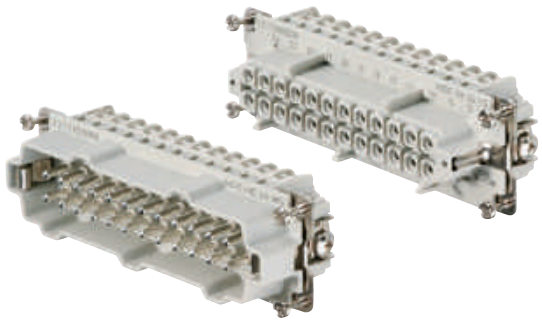
# HE series

Powerful and convenient: HE/HEE inserts enable efficient signal transmission of up to 48 contacts at maximum 16 A and 500 V. They are also now available with the innovative SNAP IN connector.



## Technical data

| | |
|---|---|
| **Standards/approvals** | |
| Standards | DIN EN 61984<br>DIN EN 60664-1 |
| Approvals | UL/CSA**, ISO 23570 (DESINA)* |
| **Inserts** | |
| No. of poles | 6, 10, 16, 24, 32, 48 |
| Rated voltage | 500 V |
| Rated voltage to UL/CSA | 600 V |
| Rated current | 16 A (6 poles 24 A) |
| Rated impulse withstand voltage | 6 kV |
| Pollution severity | 3 (630 V / 6 kV / 2) |
| Insulation resistance | ≥ $10^{10}$ Ω |
| Material | Glass-fibre reinforced PC (in UL list and approved for railway applications) |
| Temperature range | -40 °C to +125 °C |
| Flammability to UL 94 | V-0 |
| Mechanical service life | |
| – Plugging cycles Ag-Surface | ≥ 500 |
| – Plugging cycles Au-Surface | ≥ 500 |
| Contact resistance | ≤ 2 mΩ |
| **Contacts/Material** | |
| Contacts | Copper alloy |
| Surface | Passivated silver, or gold-plated |
| Clamping range/Stripping length | |
| – Crimp connection | |
| – stranded/flexible | 0.5 – 4.0 mm² / 0.5 – 4.0 mm² (AWG 20 – 12) / 7.5 mm |
| – Screw connection | |
| – solid/stranded | 0.5 – 2.5 mm² / 0.5 – 2.5 mm² (AWG 20 – 14) / 9 mm |
| – flexible/flexible with wire end ferrule | 0.5 – 2.5 mm² / 0.5 – 2.5 mm² (AWG 20 – 14) / 9 mm |
| – Tension clamp connection | |
| – solid/stranded | 0.25...2.5 mm² / (AWG 24...14 ) / 8 mm |
| – flexible/flexible with wire end ferrule | 0.25...2.5 mm² / (AWG 24...14 ) / 8 mm |
| – PUSH IN | |
| – solid | 0.5...4 mm² (AWG 20...12 ) / 10 mm |
| – flexible with wire end ferrule without collar | 0.5...2.5 mm² (AWG 20...14 ) / 12 mm |
| – SnapIn | |
| – flexible/stranded | 1...2.5 mm² (AWG 20...16) / 10 |
| – flexible with wire end ferrule | 1...2.5 mm² (AWG 20...16) / 10 |
| Clamping torque | |
| – Screw connection | 0.5 – 0.55 Nm |
| SD blades | |
| – Screw connection | 0.6 x 3.5 oder PZ0 |
| – PUSH IN | 0.4 x 2.5 |
| – Tension clamp connection | 0.5 x 3 oder 0.6 x 3.5 |
| – SnapIn | 0.6 x 3.5 |

**Note:**

* The HE 10 inserts are included in the ISO 23570 as motor terminal connectors.
** For screw, crimp, and PUSH IN connections

| | |
|---|---|
| **Contacts/Material** | |
| PE connection | |
| – Clamping range | 0.5 – 4 mm² |
| – solid/stranded | 0.5 – 4 mm² / 0.5 – 4 mm² |
| – flexible/flexible with wire end ferrule, DIN 46228 pt. 1 | 0.5 – 4 mm² / 0.5 – 4 mm² |
| – AWG conductor | AWG 20 – 12 |
| – Stripping length | 10 mm |
| – Clamping torque | 1.2 – 1.5 Nm |
| – Blade dimensions | SD 0.8 x 4 mm or PZ1 |

**Note:**
When used properly and as designated, the listed connectors may not be connected or disconnected if there is a live voltage or load!
Inserts with PUSH IN connection can be connected to the H07V-U4 conductor.

## Overview

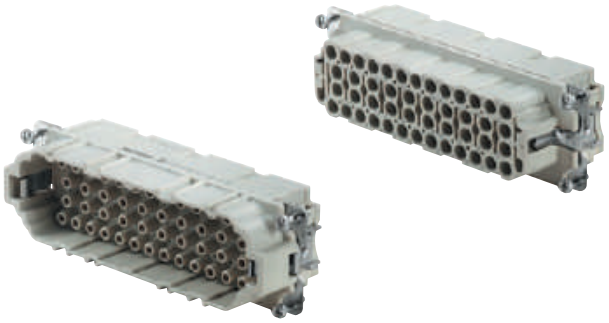
# HEE series

Powerful and convenient: HE/HEE inserts enable efficient signal transmission of up to 64 contacts at maximum 16 A and 500 V



## Technical data

| | |
|---|---|
| **Standards/approvals** | |
| Standards | DIN EN 61984<br>DIN EN 60664-1 |
| Approvals | UL/CSA |
| **Inserts** | |
| No. of poles | 10, 18, 32, 46, 64 (+ PE) |
| Rated voltage | 500 V |
| Rated voltage to UL/CSA | 600 V |
| Rated current | 16 A |
| Rated impulse withstand voltage | 6 kV |
| Pollution severity | 3 (630 V / 6 kV / 2) |
| Insulation resistance | ≥ $10^{10}$ Ω |
| Material | Glass-fibre reinforced PC (in UL list and approved for railway applications) |
| Temperature range | –40 °C to +125 °C |
| Flammability to UL 94 | V – 0 |
| Mechanical service life | |
| – Plugging cycles Ag-Surface | ≥ 500 |
| – Plugging cycles Au-Surface | ≥ 500 |
| Contact resistance | |
| Crimp connection | ≤ 2 mΩ |
| **Contacts/Material** | |
| Contacts | Copper alloy |
| Surface | Passivated silver, or gold-plated |
| Crimp connection | |
| – Flexible conductor connection | 0.5 – 4 mm² (AWG 20 – 12) |
| – Stripping length | 7.5 mm |
| PE connection | |
| – Clamping range | 0.5 – 4 mm² |
| – solid/stranded | 0.5 – 4 mm² / 0.5 – 4 mm² |
| – flexible/flexible with wire end ferrule, DIN 46228 pt. 1 | 0.5 – 4 mm² / 0.5 – 4 mm² |
| – AWG conductor | AWG 20 – 12 |
| – Stripping length | 10 mm |
| – Clamping torque | 1.2 – 1.5 Nm |
| – Blade dimensions | SD 0.8 x 4 mm or PZ1 |

**Note:**

When used properly and as designated, the listed connectors may not be connected or disconnected if there is a live voltage or load!

## Overview

| | | Size | Rated voltage | Rated current | No. of poles | Tension clamp connection | TOP connection | Screw conn. with wire guard spring | Crimp connection | PUSH IN connection | Page |

# HEEE series

HEEE inserts combine high currents up to 16A with a very high packing density. They are available as 40 and 64 pole units. They can be mounted in size 6 and 8 housings. These space-saving contact inserts are thus a solution when high-pole cables with high currents and voltages up to 500V are used.

## Technical data

| | |
|---|---|
| **Standards/approvals** | |
| Standards | DIN EN 61984<br>DIN EN 60664-1 |
| Approvals | UL/CSA |
| **Inserts** | |
| No. of poles | 40, 64 (+PE) |
| Rated voltage | 500 V |
| Rated voltage to UL/CSA | 600 V |
| Rated current | 16 A |
| Rated impulse withstand voltage | 6 kV |
| Pollution severity | 3 (630 V / 6 kV / 2) |
| Insulation resistance | ≥ $10^{10}$ Ω |
| Material | Glass-fibre reinforced PC (in UL list and approved for railway applications) |
| Temperature range | –40 °C to +125 °C |
| Flammability to UL 94 | V – 0 |
| Mechanical service life | |
| – Plugging cycles Ag-Surface | ≥ 500 |
| – Plugging cycles Au-Surface | ≥ 500 |
| Contact resistance | |
| Crimp connection | ≤ 2 mΩ |
| **Contacts/Material** | |
| Contacts | Copper alloy |
| Surface | Passivated silver, or gold-plated |
| Crimp connection | |
| – Flexible conductor connection | 0.5 – 4 mm² (AWG 20 – 12) |
| – Stripping length | 7.5 mm |
| PE connection | |
| – Clamping range | 0.5 – 4 mm² |
| – solid/stranded | 0.5 – 4 mm² / 0.5 – 4 mm² |
| – flexible/flexible with wire end ferrule, DIN 46228 pt. 1 | 0.5 – 4 mm² / 0.5 – 4 mm² |
| – AWG conductor | AWG 20 – 12 |
| – Stripping length | 10 mm |
| – Clamping torque | 1.2 – 1.5 Nm |
| – Blade dimensions | SD 0.8 x 4 mm or PZ1 |

**Note:**

When used properly and as designated, the listed connectors may not be connected or disconnected if there is a live voltage or load!

## Overview

| | | Size | Rated voltage | Rated current | No. of poles | Tension clamp connection | TOP connection | Screw conn. with wire guard spring | Crimp connection | PUSH IN connection | Page |

# HD series

The HD series has a high contact density and is therefore particularly suitable for signal processing. The HD insert can be fitted with turned crimp contacts or fibre optic contacts – impressive flexibility.

| Crimp connection | |
| – Flexible conductor connection | 0.14 – 2.5 mm² (AWG 26 – 14) |
| – Stripping length | 8.0 mm |
| PE connection | |
| – Clamping range | 0.5 – 2.5 mm² |
| – solid/stranded | 0.5 – 2.5 mm² / 0.5 – 2.5 mm² |
| – flexible/flexible with wire end ferrule, DIN 46228 pt. 1 | 0.5 – 2.5 mm² / 0.5 – 2.5 mm² |
| – AWG conductor | AWG 20 – 14 |
| – Stripping length | 10 mm |
| – Clamping torque | 1.2 – 1.5 Nm |
| – Blade dimensions | SD 0.8 x 4 mm or PZ1 |

**Note:**
For inserts with 15 or more poles, the earthing (ground) is made with a screw connection. When used properly and as designated, the listed connectors may not be connected or disconnected if there is a live voltage or load!
The HD 8 does not feature an earthing connection.

When using connectors with high contact density, we recommend the use of guide pins and sockets; see Chapter I.

## Overview

| | | Size | Rated voltage | Rated current | No. of poles | Tension clamp connection | TOP connection | Screw conn. with wire guard spring | Crimp connection | PUSH IN connection | Page |

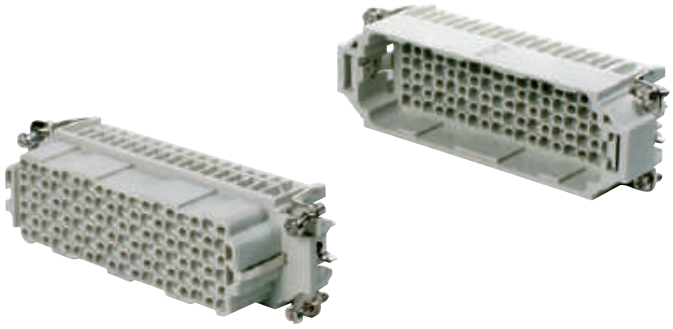
# HDD series

Effective: These inserts are specially developed for crimp and fibre-optic contacts and provide a packing density of up to 216 poles.



## Technical data

| | |
|---|---|
| **Standards/approvals** | |
| Standards | DIN EN 61984<br>DIN EN 60664-1 |
| Approvals | UL/CSA |
| **Inserts** | |
| No. of poles | 24, 42, 72, 108, 144, 216 + PE |
| Rated voltage | 250 V |
| Rated voltage to UL/CSA | 600 V |
| Rated current | 10 A |
| Rated impulse withstand voltage | 4 kV |
| Pollution severity | 3 |
| Insulation resistance | ≥ $10^{10}$ Ω |
| Material | Glass-fibre reinforced PC (in UL list and approved for railway applications) |
| Temperature range | -40 °C to +125 °C |
| Flammability to UL 94 | V-0 |
| Mechanical service life | |
| – Plugging cycles Ag - Surface | ≥ 500 |
| – Plugging cycles Au - Surface | ≥ 500 |
| Contact resistance | |
| Crimp connection | ≤ 4 mΩ |
| **Contacts/Material** | |
| Sockets and plug-in contact | Copper alloy |
| Surface | Passivated silver, or gold-plated |
| Crimp connection | |
| – Flexible conductor connection | 0.14 – 2.5 mm² (AWG 26 – 14) |
| – Stripping length | 8.0 mm |
| PE connection | |
| – Clamping range | 0.5 – 2.5 mm² |
| – solid/stranded | 0.5 – 2.5 mm² / 0.5 – 2.5 mm² |
| – flexible/flexible with wire end ferrule, DIN 46228 pt. 1 | 0.5 – 2.5 mm² / 0.5 – 2.5 mm² |
| – AWG conductor | AWG 20 – 14 |
| – Stripping length | 10 mm |
| – Clamping torque | 1.2 – 1.5 Nm |
| – Blade dimensions | SD 0.8 x 4 mm or PZ1 |

**Note:**

When used properly and as designated, the listed connectors may not be connected or disconnected if there is a live voltage or load!

## Overview

| | | Size | Rated voltage | Rated current | No. of poles | Tension clamp connection | TOP connection | Screw conn. with wire guard spring | Crimp connection | PUSH IN connection | Page |

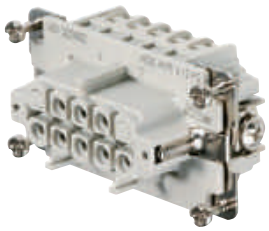
# HVE series

Weidmüller high-voltage inserts are equipped with lagging contacts. This results in more security during real operations.



## Technical data

| | |
|---|---|
| **Standards/approvals** | |
| Standards | DIN EN 61984<br>DIN EN 60664-1 |
| Approvals | UL/CSA** |
| **Inserts** | |
| No. of poles | 3 + 2, 6 + 2, 10 + 2 |
| Rated voltage | 830 V |
| Rated voltage to UL/CSA | 600 V |
| Rated current | 20 A |
| Rated impulse withstand voltage | 8 kV |
| Pollution severity | 3 (1000 V / 8 kV / 2) |
| Insulation resistance | ≥ 1010 Ω |
| Material | Glass-fibre reinforced PC (in UL list and approved for railway applications) |
| Temperature range | -40 °C to +125 °C |
| Flammability to UL 94 | V-0 |
| Mechanical service life | |
| – Plugging cycles Ag - Surface | ≥ 500 |
| Contact resistance | ≤ 2 mΩ |
| **Contacts/Material** | |
| Contacts | Copper alloy |
| Surface | Passivated silver |
| Clamping range/Stripping length | |
| – Screw connection | 0.5 – 2.5 mm2 (AWG 20 – 14) / 8 mm |
| – Tension clamp connection | 0.25 – 2.5 mm2 (AWG 24 – 14) / 8 mm |
| Clamping torque | |
| – Screw connection | 0.5 – 0.55 Nm |
| SD blades | |
| – Screw connection | 0.6 x 3.5 oder PZ0 |
| – Tension clamp connection | 0.5 x 3 oder 0.6 x 3.5 |
| PE connection | |
| – Clamping range | 0.5 – 4 $mm^2$ |
| – solid/stranded | 0.5 – 4 $mm^2$ / 0.5 – 4 $mm^2$ |
| – flexible/flexible with wire end ferrule, DIN 46228 pt. 1 | 0.5 – 4 $mm^2$ / 0.5 – 4 $mm^2$ |
| – AWG conductor | AWG 20 – 12 |
| – Stripping length | 10 mm |
| – Clamping torque | 1.2 – 1.5 Nm |
| – Blade dimensions | SD 0.8 x 4 mm oder PZ1 |

**Note:**

When used properly and as designated, the listed connectors may not be connected or disconnected if there is a live voltage or load! Rated voltage determined on the basis of DIN EN 61984 section 6.19.2.2.
500 V for signal contact.
** For screw connection

## Overview

| | | Size | Rated voltage | Rated current | No. of poles | Tension clamp connection | TOP connection | Screw conn. with wire guard spring | Crimp connection | PUSH IN connection | Page |

# HSB series

Safe: Our HSB inserts are equipped with screw connections, including wire protection springs. They transmit currents up to 35 A per contact.

## Technical data

| | |
|---|---|
| **Standards/approvals** | |
| Standards | DIN EN 61984<br>DIN EN 60664-1 |
| Approvals | UL/CSA |
| **Inserts** | |
| No. of poles | 6, 12 |
| Rated voltage | 400 V |
| Rated voltage to UL/CSA | 600 V |
| Rated current | 35 A |
| Rated impulse withstand voltage | 6 kV |
| Pollution severity | 3 |
| Insulation resistance | ≥ $10^{10}$ Ω |
| Material | Glass-fibre reinforced PC (in UL list and approved for railway applications) |
| Temperature range | -40 °C to +125 °C |
| Flammability to UL 94 | V-0 |
| Mechanical service life | |
| – Plugging cycles Ag-Surface | ≥ 500 |
| – Plugging cycles Au-Surface | ≥ 500 |
| Contact resistance | |
| Screw connection | ≤ 2 mΩ |
| **Contacts/Material** | |
| Sockets and plug-in contact | Copper alloy |
| Surface | Passivated silver |
| Screw connection | |
| – Clamping range | 0.5 – 6 $mm^2$ (AWG 20 – 10) |
| – Stripping length | 11 mm |
| – flex. with wire end ferrule acc. to DIN 46228 pt. 1 | 4 $mm^2$ |
| Clamping torque | |
| – Screw connection | 1.2 – 1.5 Nm |
| SD blades | 0.6 x 3.5 or 0.8 x 4 mm |
| PE connection | |
| – Clamping range | 0.5 – 6 $mm^2$ |
| – solid/stranded | 0.5 – 6 $mm^2$ / 0.5 – 6 $mm^2$ |
| – flexible/flexible with wire end ferrule, DIN 46228 pt. 1 | 0.5 – 6 $mm^2$ / 0.5 – 6 $mm^2$ |
| – AWG conductor | AWG 20 – 10 |
| – Stripping length | 10 mm |
| – Clamping torque | 2 – 2.5 Nm |
| – Blade dimensions | SD 1 x 5.5 mm or PZ2 |

**Note:**

When used properly and as designated, the listed connectors may not be connected or disconnected if there is a live voltage or load! When connecting flexible conductor with a screw connection, you should use ferrules, according to DIN 46228, section 1.

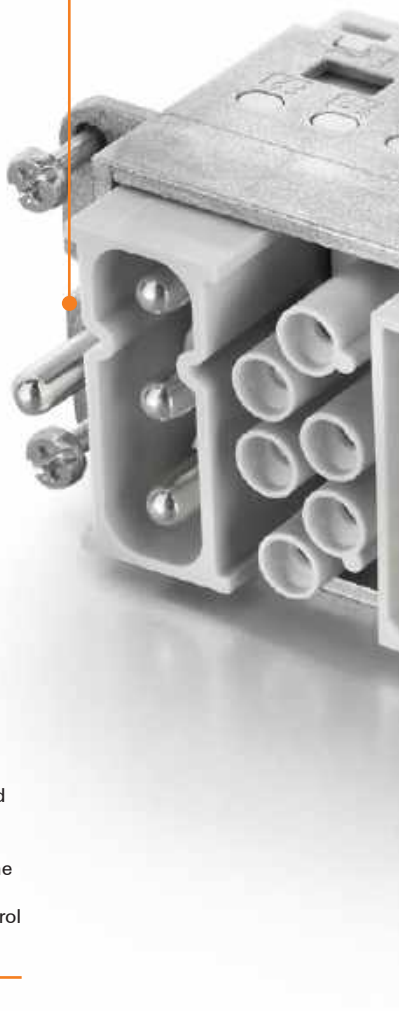
## Great performance in the smallest of spaces

Industrial applications are becoming increasingly complex. The demands being made of the connectivity used are growing at the same time. Functionality in the smallest of installation spaces, safe installation and a fast retrofitting process are just some of the product properties being called for.

Not only does our RockStar® ModuPlug modular plug-in connector system meet current market requirements; it has been specially designed with the future in mind too. Thanks to the new variety of module sizes, you can fit more applications than ever before in one plug-in connector. The modules reduce the amount of space required and cut costs when compared with fixed-pole inserts and other modular plug-in connector systems.
The sophisticated frames and modules can be installed with extreme ease and integrated into HDC enclosures with the IP65 and IP68 protection classes. You can even use the RockStar® ModuPlug to supplement existing applications without any need to make system adjustments.

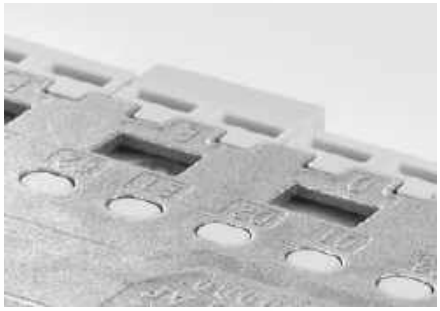


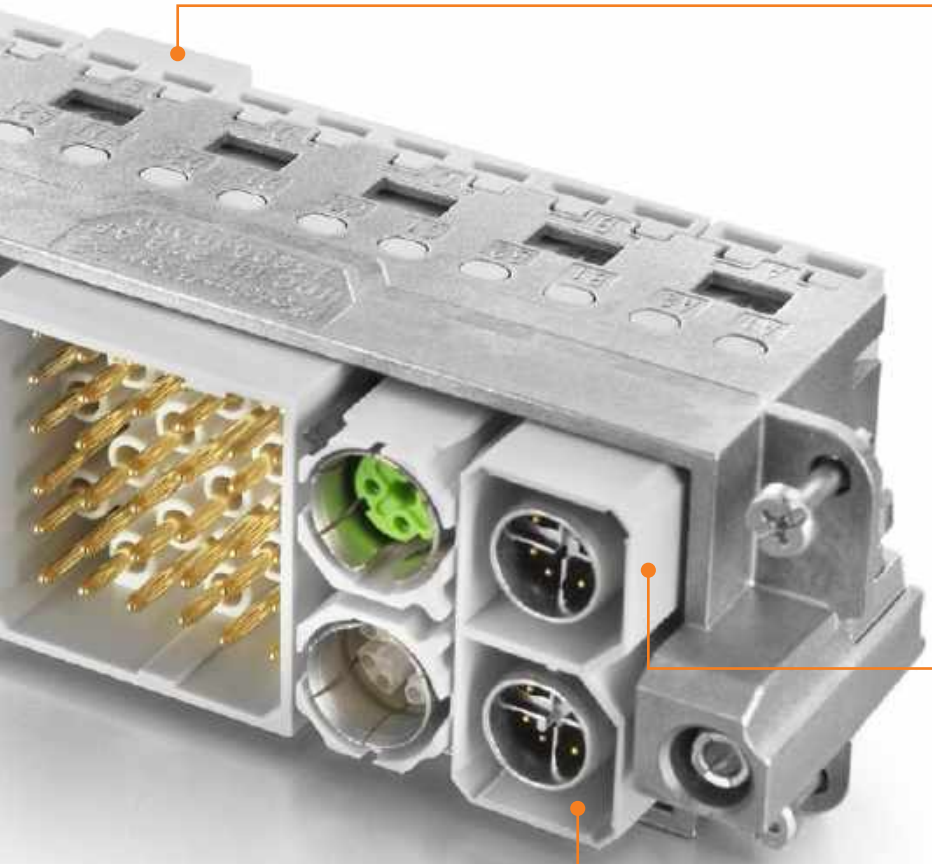
**Pneumatic modules**
The new pneumatic modules can be integrated into any connector configuration. They enable the safe and efficient supply of compressed air to drives, controls, braking systems, holding, and unloading devices.

**Terminal block modules**
The new terminal block modules with PUSH IN connection technology open up unexpected possibilities – especially for distribution solutions in the otherwise unused area on the control cabinet wall. With up to 48 poles in one connector, they enable particularly efficient wiring from the field to the devices in the control cabinet.

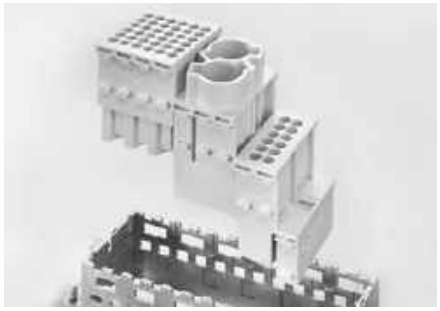
**Simple**
The innovative sliding frame has two defined locking positions for opening and closing – thus enabling simple, tool-free module installation.

**Secure**
The round and rectangular coding on the frame enables intuitive module plug-in. The two-point fixation prevents incorrect connection and keeps the modules tilt and vibration-resistant.





**Flexible**
The four module sizes make for individual plug solutions that save a huge amount of space. The smaller pitch translates into an optimised design too.



**Compact**
The new two-pole bus module is particularly compact and can accommodate megabit and gigabit data inserts. It enables the transmission of two Gigabit Cat 6A (10GBit) cables in one module.

# RockStar® Housings IP65 / NEMA Type 12, 4X

Where something extra comes as standard. The high quality workmanship of RockStar® IP65 housings begins with the material from which all interlock mechanisms are made: stainless steel. It guarantees a long lifespan with high resistance to corrosion and impact. For the die-cast aluminium variants, a high-quality, multi-stage surface sealing provides years of safety and reliability – even under the most extreme conditions. With just one housing series, Weidmüller delivers the proper protective solution for your heavy-duty connector – so your choice is simple.

Other standard extras:
- A patented spring system provides a secure interlock and easier handling.
- Integrated threads: your choice of cable glands
- Integrated insulation strips: for worry-free transmission of higher voltages

RockStar® IP65 housings are available in twelve sizes and can be combined with all fixed-pole and modular inserts.

**Sturdy**
Stainless steel interlock systems and multi-stage surface sealing results in high durability

**Reliable**
Guaranteed protection against jets of water, corrosion, ice and rain, according to IEC 60529 and UL.

**Practical**
Laser labelling for permanent identification and faster allocation

**Introduction** E.2

**RockStar® Housings IP65 / EMC** E.4

Size 3, 4, 6 and 8

# Optimal protection against electric or electromagnetic fields

## HDC IP65 EMC enclosure with above-average shielding properties

Protection against electrical and electromagnetic influences is essential in many industries to ensure fault-free operation. RockStar® HDC IP65 EMC enclosures can be used wherever optimal shielding with low transfer impedance is required.

The labyrinth structure on the housing enables reliable data transmission, which reduces the risk of system failure and increases productivity. The FPM sealing material permits RockStar® HDC IP65 EMC enclosures to be used indoors as well as outdoors. With only one type of enclosure, the number of storage items decreases significantly. The conductive and corrosion-resistant surface coating meets increased environmental requirements and lowers procurement costs.

**Your special advantages**

- Effective labyrinth structure for secure data transmission
- Extremely reliable FPM seals for indoor and outdoor use
- Internal O-ring seal for quick and easy installation

**Effective labyrinth structure**
Excellent shielding effect is achieved due to the unique labyrinth structure and the large contact area between the bulkhead mount and hoods.

**Corrosion-resistant, conductive surface**
The unique surface finish makes the housing impact-resistant, electrically conductive and corrosion-resistant–even in seawater environments.

**Robust sealing material**
The ozone- and UV-resistant sealing material FPM withstands an extended temperature range from –40 to +150 °C.

# RockStar® Housings IP66 / IP68 / EMC

**RockStar® Housings IP66 / IP68 / EMC**

**Introduction** F.2

**RockStar® Housings IP66 / IP68 / EMC** F.4

Size 1 - 8

# RockStar® Housings IP66 / IP68 / EMC

The RockStar® IP68 and IP69K housings are resistant to sea water and high impacts. They are designed for use under extreme environmental conditions and comply with the high vibration requirements of DIN EN 61373 Cat 2 (pivot mounting). These housings deliver a fail-safe and maintenance-free solution when using heavy-duty connectors in transportation, traffic engineering and energy technology.  They are also suitable for applications subject to extreme climatic conditions.
Weidmüller has designed the RockStar® IP68 housings with additional built-in features that ensure outstanding EMC. The bulkhead or base housing, combined with the plug housing, produces a labyrinth structure which ensures high shield attenuation.
RockStar® IP68 housings are available in sizes 1, 3, 4, 6, 8 and 8 XXL; they can be combined with all fixed-pole and modular inserts.

**Impact resistant**
The optimised construction provides high impact resistance and therefore, a long product lifespan

**Practical**
Laser labelling for permanent identification and faster allocation

**Simple**
A screw lock with internal and external hex drive is used for the housing's closure mechanism.

# RockStar® Wall mounting housing IP66

**RockStar® Wall mounting housing IP66**

**Introduction** G.2

**RockStar® Wall mounting housing IP66** G.4
Size 3, 4, 6 and 8

# RockStar® Wall mounting housing IP66

Our RockStar® wall mounting housings made of polyamide are used wherever the focus is on weight, robustness and cost-effectiveness. We satisfy these requirements with a light plastic housing with an attached cable gland and screw interlock made of stainless steel. This housing can be connected directly on the panel wall thanks to simple attachment flanges. There is no need for a usual attachment housing.

RockStar® wall mounting housings are available in four sizes and can be combined with all fixed-pole and modular HDC inserts.

Areas of application for our RockStar® wall mounting housings include machinery and plant engineering, the automotive industry, panel building and wind power plants.

**Flexible**
The housing can be combined with all fixed-pole and modular HDC -RockStar® inserts

**Practical**
More cost effective thanks to the attached cable gland

**Simple**
The flange-mounted housing seals directly onto the panel wall without an attachment housing

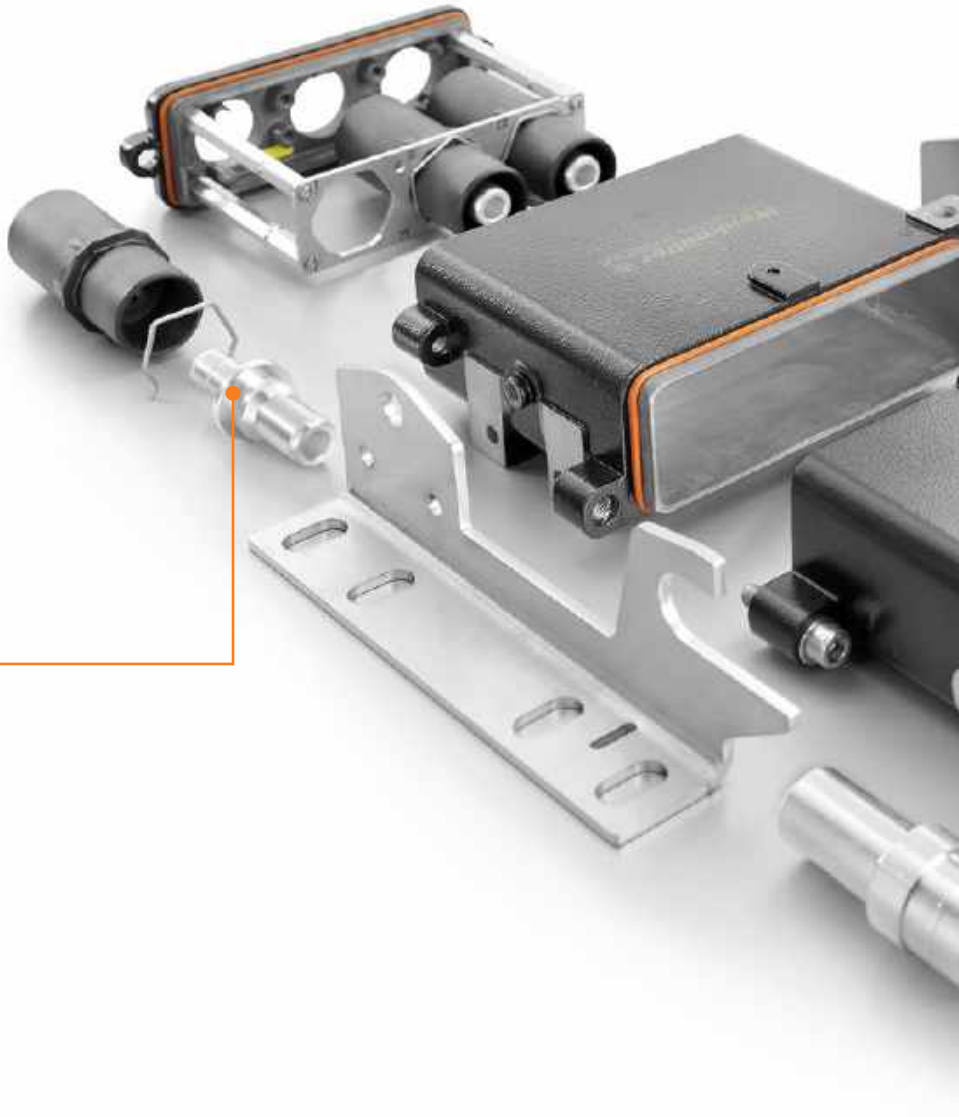
4,000 V
250 A
1 – 4 poles

**RockStar® HighPower 550 A** H.10
4,000 V
550 A
1 – 3 poles

# RockStar® HighPower

Uncompromising power – in clever and safe packaging. The RockStar® HighPower modular high-current connector system has been custom designed for the high demands of traffic engineering applications. The system also meets the requirements of the wind power industry. The modular set-up consists of one-piece crimp contacts, insulating sleeves, insert-holder frames and a robust multi-part die-cast aluminium enclosure in IP68, as well as cross-connection options.

This modular design offers clear advantages for handling: It is possible to wire crimped lines with large cross-sections and to see this process through to the final step. The wiring can be achieved using standard cable glands.



**Safe**
Tried-and-tested, low-maintenance crimp-connection technology with stranded, finely stranded and very finely stranded flexible copper conductors measuring up to 240 mm² with standardised tools

**Practical and universal**
A multitude of potential applications have been made pluggable for the first time ever – simply by integrating cross-connections.

**Perfectly optimised shielding**
Along with the 360° contact, the shielding connection integrated in the enclosure is the cutting edge of what is technically feasible at present.

# HighPower 250 A

RockStar® HighPower is designed to meet the strict standards set by DIN EN 61373 Cat. 2 (pivot mounting). The coordinated connector components provide you with a fail-safe and maintenance-free power transmission solution: in this case up to 250 A / 4,000 V.

# HighPower 550 A

RockStar® HighPower is designed to meet the strict standards set by DIN EN 61373 Cat. 2 (pivot mounting). The coordinated connector components provide you with a fail-safe and maintenance-free power transmission solution: in this case up to 550 A / 4,000 V.

## Technical data

| | |
|---|---|
| **HighPower 550 A sereis** | |
| Standards | DIN EN 50124-1<br>In compliance with DIN EN 61984<br>DIN EN 50155<br>DIN EN 61373 KAT 2 (Pivot mounting) |
| Number of contacts | 1-, 2-, 3 poles |
| Wire connection method | Crimp |
| Rated current | 550 A |
| Rated insulation voltage<br>(highest permitted operating voltage) | |
| AC wire – wire | 4,000 V (4,800 V)* |
| AC wire – earthed housing | 3,000 V |
| DC wire – wire | 4,000 V (4,800 V)* |
| DC wire – earthed housing | 3,000 V |
| Rated impulse voltage | |
| Wire – wire | 25 kV |
| Wire – earthed housing | 15 kV |
| Surge voltage category | OV 3 |

# RockStar® Kits

RockStar® kits are sets consisting of all components necessary for assembling a heavy-duty connector. The kit includes the male and female inserts, the plug housing, the bulkhead housing and the cable gland.

**The benefits for you:**

- Easy to purchase – only one ordered part for all items
- Easy to use – just one package with no individual parts
- Wide variety – we'll put together a customised kit for whichever components you need.

**Easy to choose**
All components at a single glance – each matched to the required number of poles, size and wire connection method

**Easy to stock**
Only one package is needed for the complete connector. The RockStar® kits simplify your logistics.

**Easy to install**
You only need a screwdriver to install the connector in the field.

# RockStar® Accessories

In addition to heavy-duty connectors, RockStar® also includes functional and safety accessories – including crimp contacts, coding systems and shield clamps – to help you with your facility cabling.

A technically proper crimp connection should be gas-tight and corrosion-resistant. Machined crimp contacts are available with different performance requirements and with either silver or gold plating.

When aligning multiple connectors with similar mating profiles within one facility, you must safeguard against accidental plugging mistakes. The RockStar® product line also includes the corresponding locking pins, coding systems and pole coding for this purpose.

If multiple shielded cables are being fed into the connector housing using a flexible hose or a multi-cable feed, then the shielding should normally be connected to a shield clamp attached to an insert. The potential is conducted to the housing using the metallic transition. The shielded conductor is fastened to the shield clamp with shield clips, which are available in a variety of sizes.

**Solid**
Weidmüller's coding system can help you to clearly classify and organise your connectors while also ensuring that they cannot be plugged in incorrectly.

**Secure**
Solid, machined crimped contacts ensure a gas-tight and corrosion-resistant crimp.

**Optimised shielding**
Shield clamps and shield clips allow the shield to be directly attached to the connector housing.

## Fibre optic contacts

Fibre-optic cables guarantee interference-free transmission without any feedback.

The new fibre-optic contacts can now also be used in heavy-duty connectors. Their shape corresponds to that of our proven HD contacts for connecting conventional copper wires. Accordingly, they can be assembled in existing connectors of the HD series, as well as being suitable for use with the ConCept modular system. It is even possible to connect fibre-optic wires and copper wires in a single connector.

The advantages at a glance:

- Immune to electromagnetic interference
- Absolute contact separation
- Weight reduction by dispensing with copper wires
- High transmission capacity and large bandwidth
- All advantages now also available for robust industrial environments

### HDC-C-HD ... LWL 1.0 POF

HD inserts must be ordered separately

## Instructions for assembling fibre optic contacts

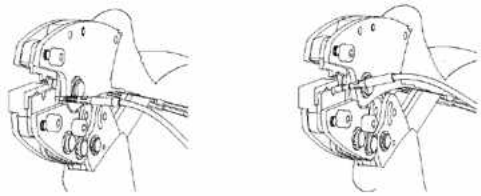
1. Cut POF cable (polymer optical fibre) to the required length with cutting tool (we recommend the KT 8).

2. The end face of the fibre of 2.2 mm POF cables must be polished before crimping onto the fibre optic contact. Insert end of POF cable into polishing disc and polish with polishing sheet placed on a smooth surface (e.g. glass plate). Wipe away any residues after polishing. The best optical attenuation values are obtained with wet polishing.

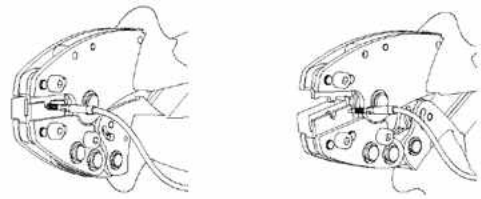
3. Strip sheath of 2.2 mm POF cable to at least 14 mm for female contacts (HDC-C-HD-B-LWL) and at least 19 mm for male contacts (HDC-C-HD-S-LWL).

4. Crimping:
   - A. Insert POF cable into male contact, then both together into the crimping die.
   - B. The female contact has to be inserted angled slightly downwards into the die. Make sure the end face of the contact and the plastic fibre press against the locator.
   - C. Squeeze the hand levers until the tool unlocks.
   - D. Release option in case of incorrect operation.

A. Male B. Female



C.



D.

## Coding pins

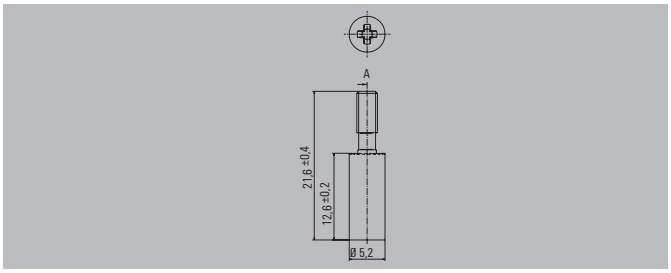
Where several connectors of similar type are arranged on a machine, it is essential to avoid the risk of connectors being inserted in the wrong place.
If you have up to six connectors to code, Weidmüller coding pins are the simplest solution. They allow six secure coding variations.

In this case, you substitute two M3 fastening screws on the female insert by coding pins. On the male insert, you leave the opposing fastening screws where they are and substitute the others by coding pins. You then have a pair of inserts that fit together. The coding diagram illustrates the system.

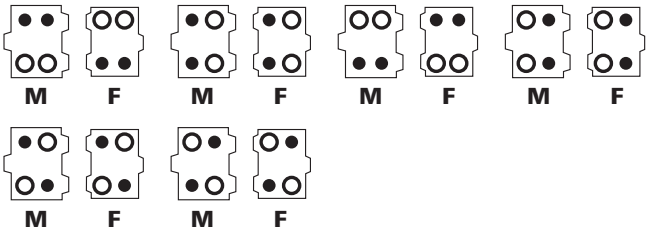
### Ordering data

| Type | Qty. | Order No. |
|---|---|---|
| SPB-M 3 | 10 | 1203600000 |

Allow 4 coding pins for each connector.



### Coding arrangement for coding pins



## Coding system with guiding function

If you have more than six connectors of similar type to code, you need coding pins and coding sockets.
Replace all M3 fastening screws of an insert by two coding pins and two coding sockets. You then fit two coding pins and two coding sockets to the mating insert, in a complementary arrangement.

Fit coding pins to the other connectors in the same way, but with a different arrangement. The coding diagram illustrates the system. The coding sockets cannot be used in combination with separate housing covers

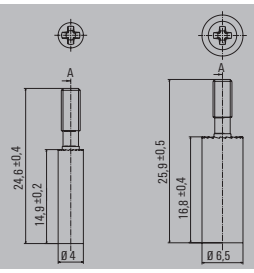
### Ordering data DSTV

**For fixed-pole inserts**

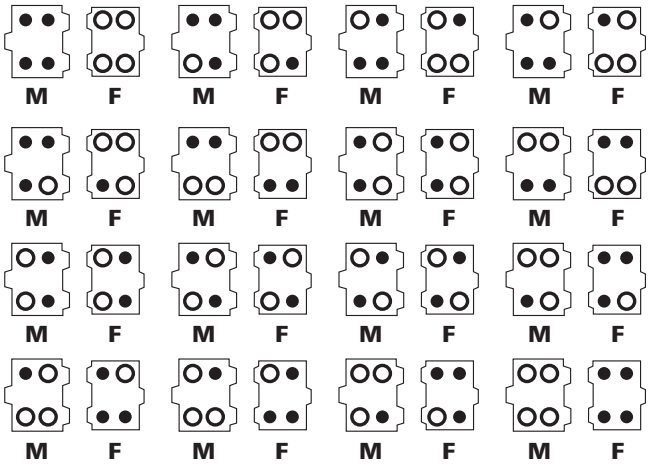
Cod. socket 5 mm dia
Cod. pin 4 mm dia

| Type | Qty. | Order No. |
|---|---|---|
| DSTV COST4 | 100 | 1471300000 |
| DSTV COBU5 | 100 | 1471500000 |

Plan to have four coding pins and four coding sockets for each connector.



### Coding arrangement for coding pins



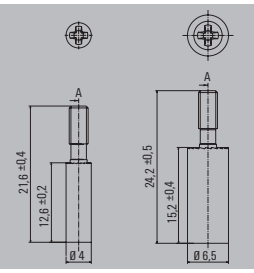
### Ordering data HDC CM

**For ModuPlug metal frames**

Cod. socket 5 mm dia
Cod. pin 4 mm dia

| Type | Qty. | Order No. |
|---|---|---|
| HDC CM GUIDING PIN | 100 | 1202660000 |
| HDC CM GUIDING SOCKET | 100 | 1202670000 |

Plan to have four coding pins and four coding sockets for each connector.



J

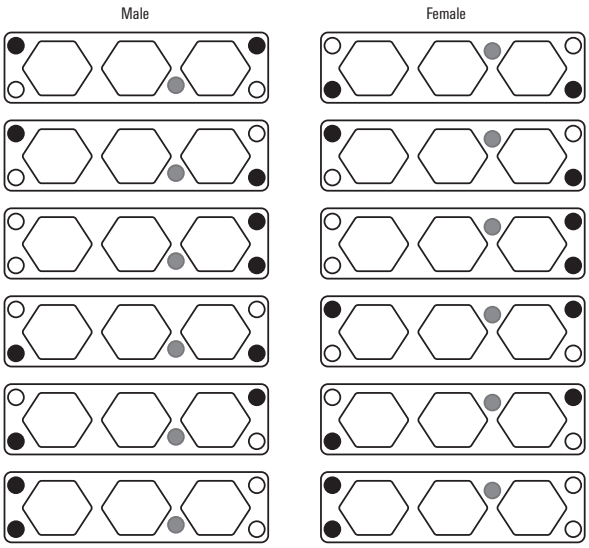
## Assembly instructions for the coding system for the RockStar® HDC HighPower connectors

The coding elements (available under Accessories) can be used to code up to six connectors.

### Ordering data

| Coding pin | Type | Order No. |
|---|---|---|
|  | HDC HP CODING SYSTEM | 1160780000 |

### Coding arrangement Male/Female



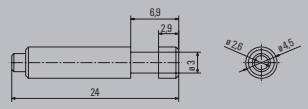
## HE coding pin

Use the HE coding pin for a quick and simple solution to avoid mixing up your plug-in connections. The coding pin can be inserted into a single contact chamber (instead of a crimp contact) on both the male and female side of the connector. The opposite mated contact then remains free. The HE coding pin can be used to code all inserts and modules using HE-series crimp contacts.

These include the following:
- HA crimp inserts
- HE crimp inserts
- HEE inserts
- HEEE inserts
- HQ 5 insert
- HQ 8 insert
- S8/24 insert (power contacts)

### Ordering data

| Type | Qty. | Order No. |
|---|---|---|
| HDC HE CP | 100 | 1003240000 |



## HQ 7 coding system

You can protect 7-pole HQ connectors against false insertions by using the HQ 7 coding system. Both a coding pin and socket are used for protection. Six different variants are permitted by the shape of the optional coding which is aligned centrally in the connector. Refer to the coding diagram for the layout.

### Ordering data

| Type | Qty. | Order No. |
|---|---|---|
| HDC HQ 7 CPM | 50 | 1003230000 |
| HDC HQ 7 CPF | 50 | 1003220000 |

**Note:**
Six-way coding is possible with a coding pin.

**Note:**
For all inserts apart from HA and all inserts of size 1

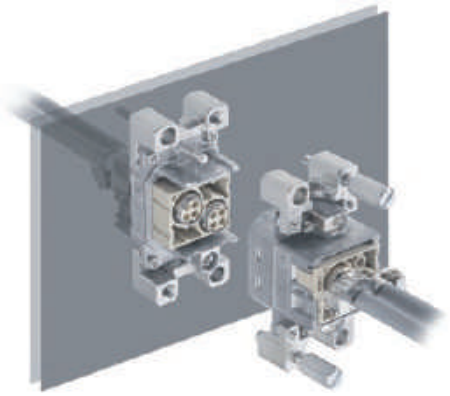
## HDC screw adapter

The screw adapter is an IP20 installation solution with a full metal construction. The inserts are screwed into the screw adapters. The fastening screws for the inserts should be tightened with 0.5 Nm torque.

After the contact insert has been properly connected with the screw adapter, it can be mounted to the bulkhead or used as a mating connector, depending on the particular version. Three different screw adapters are possible based on the screw-in angle. The required mounting hardware is included.



### HDC ADAPTER W. SCREW

| Type | Qty. | Order No. |

## Protective transportation cap for IP65 housings

The protective transportation caps are available for sizes 3, 4, 6 and 8. They can be used with the IP65 standard housings. The transportation caps are easy to attach and provide IP20 protection. They can be used with all bottom housing sections, bulkhead housings or base housings. A lanyard (not included) can be threaded through the built-in eyelet.

### Technical data

## Hydraulic sheet holes

Incl. accessories:
- 1 HSS pre-drill Ø 10 mm
- 1 tension bolt Ø 19 mm
- 1 tension bolt Ø 19 x 9.5 mm
- 1 spacer nut set (3-part)
- 1 bridge

## IE-KO-HAT

- Pressure relief valve protects against overloading
- Cylinder head angled at 90°
- Angled head can be rotated through 360°
- Ergonomic handle springs back automatically
- The waste piece no longer becomes jammed thanks to 3-fold splitter
- Hydraulic punch made of high-strength aluminium (approx. 40% weight saving)
- Service life greatly reduced when stainless steel sheets are used

## KOK

- Rectangular splitting stamp for heavy-duty connectors

J

| SD EL SET 1.5-4.0/PH0/1 | | | | **2750160000** |

## Weidmüller Allen key set

Socket wrench manufactured from through-hardened chromium-vanadium steel, manufactured according to DIN ISO 2936 L (DIN 911), high-quality finished surface.

### SK WSD S

9-piece offset Allen key set in the Prostar, with MagicRing:
tightly holds standard screws in any position thanks to its spring steel ring (up to size 3), with ball head for screwing up to an angle of 25°.

| Type | Size / AF | a | b | c | Order No. |

## CA 100/10

**4...10 mm²**

The CA 100/10 is an electropneumatic powered automatic stripper and crimper for time-saving and rational processing of loose wire end ferrules.It has been developed for the assembly of medium series cables in stationary areas.The automatic machines feature quick and easy handling.

- Stripping and crimping in one operation
- Electropneumatic drive
- Stripping and crimping in a range of 4 to 10 mm² (AWG 12 – 8)
- Processing of wire end ferrules of various crimping length
- Quick and easy retooling
- Oscillating conveyor to hold loose wire end ferrules
- Optional processing of wire end ferrules without plastic collar possible

### Technical data

| | CA 100/10 |
|---|---|
| Crimping range | 4 ... 10 mm² (AWG 12...8) (with usage of the respective tool set) |
| Crimping lengths | 6...18 mm |
| Connection | 100 - 240 V / 50 - 60 Hz / 100 VA |
| Drive | Electropneumatic |
| Compressed-air connection | 5 - 5.5 bar |
| Pulse time | approx. 2.5 sec. |
| Crimping | Trapezoidal crimp |
| Dimensions W x D x H (mm) | 530 x 400 x 460 |
| Weight | 40 kg |
| Options | Quadrocrimp tool: for a perfectly square four-sided crimp |

### Ordering data

| Type | Qty. | Order No. |
|---|---|---|
| CA 100/10 | 1 | on request |

### Note on ordering

In order to precisely determine the required conversion tool, you will need the exact specifications for both the wire end ferrules being processed and the cables being processed.

## CA Indent

**0.14...2.5 mm²**

The CA Indent is an electro-pneumatic-driven automatic stripper and crimper for processing loose-packed, turned male and female contacts. The contacts are fed automatically via an oscillating conveyor set-up. Conductors and contacts in the 0.34 ... 2.5 mm² range (AWG 22 to 14) can be crimped normally with a indent crimp shape, in compliance with MIL C-22520/1-01. The settings for stripping and crimp depth are motor- driven. The values can be saved in 50 different programs. The keyboard is used for configuration and programming. Important data, functions and errors are shown on the LCD display. With the help of the appropriate tools, the automatic crimper may be converted to various contacts and/or conductors.

- Stripping and crimping in one operation
- Electro-pneumatic drive
- Strips and crimps 0.14 - 2.5 mm² (AWG 26-14)
- Processes loose twisted pin and socket contacts
- Weidmüller HDC-C-HD/HE contacts further contacts on request
- Rapid and simple change-over
- Vibration-feeder takes 500 loose machined contacts
- Indent crimp conforms with MIL C-22520/1-01
- Program memory for 50 contact variations
- Stripping and crimping dimensions adjusted by means of electric motor

### Technical data

| | CA Indent |
|---|---|
| Stripping range | 0.14 ... 2.5 mm² / (AWG 26-14) |
| Connection | 100 - 240 V / 50 - 60 Hz / 185 VA |
| Drive | pneumatic |
| Compressed air connection | 5 - 5.5 bar |
| Processing time | approx. 2,5 s |
| Size W x D x H | 450 x 490 x 420 |
| Weight | 40 kg |

### Ordering data

| Type | Qty. | Order No. |
|---|---|---|
| CA Indent | 1 | on request |

### Note on ordering

The machine is set up using sample contacts to suit the user's requirements. For this we need the name of the manufacturer, the type designation and the cross-sections of the contacts.

Detailed quotation available on request.

# Cable entries

Weidmüller offers a variety of add-on components for a multitude of purposes and applications to complement its extensive Klippon® Protect range.

In addition to brass, plastic and stainless steel cable glands, there are also sealing plugs, pressure-equalising elements, adapters and relevant accessories – such as lock nuts, flat gaskets, flat washers and earthing rings – available.

To match the assembled enclosures, the cable glands meet the requirements of IP protection classes IP54 to IP69K. They can be used in standard industrial applications, EMC applications or even in potentially explosive atmospheres as required, and they comply with the approvals required for these purposes.

Ex-certified cable glands also allow for the connection of cables and conductors with different reinforcements with and without lead sheathing, as well as the connection of steel wire and steel tape cables. They can also be used in a temperature range of between -50 °C and +120 °C.

Depending on the cable gland variants and application, the cable glands, sealing plugs, adaptors, pressure-equalising elements and accessories are manufactured and certified according to the following standards:

- IEC/EN 62444 (construction and performance)
- IEC/EN 60529 (IP protection class testing)
- IEC/EN 60079-0 (general Ex requirements)
- IEC/EN 60079-1 (Ex d Ex standard)
- IEC/EN 60079-7 (Ex e Ex standard)
- IEC/EN 60079-11 (Ex i Ex standard)
- IEC/EN 60423 (metric screw thread)
- DIN 40430 (PG and NPT thread)

The range of cable glands, sealing plugs and pressure-equalising elements is available in metric (M) and high-strength (PG) threads in sizes ranging from M12 to M75 and PG7 to PG48. When choosing cable glands and sealing plugs, please refer to the table with the sealing characteristics of the O-rings, flat gaskets and seal inserts. O-rings and flat gaskets are always intended for sealing the connecting thread on an enclosure, for example, while the sealing insert of each cable gland is intended for actually sealing and clamping the connecting cable.

You can find this product family
in our Weidmüller Configurator:
**www.weidmueller.com/wmc**

You should always observe the maximum drill-hole diameter when installing a cable gland, sealing plug, adaptor, or pressure compensation element (e.g. onto the gland plate of an enclosure). These must not exceed the following specified maximum values / tolerances so that the protection degree of the whole enclosure can be guaranteed.
Please also refer to the instruction manual; deviating information is possible.

## Through-hole information

| M thread | Through-hole, in mm |
|---|---|
| M 12 | 12.2 |
| M 16 | 16.2 |
| M 20 | 20.2 |

| M 32 | 32.2 |
| M 40 | 40.2 |
| M 50 | 50.2 |
| M 63 | 63.2 |
| M 75 | 75.2 |
| **PG thread** | **Through-hole, in mm** |
| PG 7 | 12.4 |
| PG 9 | 15.1 |
| PG 11 | 18.5 |
| PG 13.5 | 20.4 |
| PG 16 | 22.5 |
| PG 21 | 28.3 |
| PG 29 | 37.4 |
| PG 36 | 47.2 |
| PG 42 | 54.2 |
| PG 48 | 59.5 |

## Overview of sealing materials for O-rings, flat gaskets as well as seal inserts

| Abbreviation | Material | Trade name | Temperature range | Chemical resistance | Fire resistant | Shore | Free from halogens | UV resistance |
|---|---|---|---|---|---|---|---|---|
| **TPE** | Thermo-plastic elastomer | Santroprene | –40 °C to +130 °C | Hydrocarbons, oils, acids | UL94, HB | 64 | Yes | very good |
| **CR** | Chloroprene rubber | Neoprene | –40 °C to +130 °C | Mineral oils, greases, fuels | very good | 40 - 90 | No | very good |
| **NBR** | Nitrile rubber | Perbunan, Nitrile | –40 °C to +130 °C | Hydrocarbons, oils, acids, aliphatic solvents, greases, fuels | weak | 40 - 90 | No | good |
| **EPDM** | Ethylene-propylene-diene rubber | Keltan | –50 °C to +130 °C | Weather-, grease-, mineral oil-, chlorine-,and ozone resistant, hydrocarbons | weak | 20 - 90 | | very good |
| **FPM** | Fluoro-rubber | Viton | –25 °C to +200 °C | ozone, oxygen, mineral oils, synthetic hydraulic fluids, fuels, aromatics, many organic solvents and chemicals | weak | 65 - 95 | | good |

**Note:** The data refer only to the sealing material, not to the entire component.

## Abbreviations – technical data

| | |
|---|---|
| A, L | Length in mm |
| L1 | Length of thread in mm |
| D | Diameter in mm |
| S | Thickness in mm |
| S1,S2 | Depth in mm |

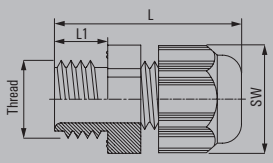
| KB | Clamping range in mm |
| KB ZE | Clamping range strain relief in mm |
| Thread | External thread |
| SUHB | Shroud / Protective cap |
| DR | Tightening torque in Nm |
| HM | Cap nut / pressure screw |
| Qty. | Packing unit in pieces |

## Product designation

| | |
|---|---|
| VP HEX | Sealing plugs with hexagon head |
| A2L | Ex Cable gland |
| A2LC | Ex Cable gland with conduit connection thread |
| E1W | Ex Cable Gland with double sealing for SWA armoured cable |
| E1XZ | Ex Cable Gland with double sealing for SWB/STA armoured cable |
| VG | Cable gland |
| VP | Sealing plugs |
| SKMU | Hexagon nut |
| DAE | Pressure compensation element |
| BD | Breather drain (compensation element) |
| SZS | Serrated Star Washers (Serrated washers) |
| ZE | Strain relief |
| EMV | Electromagnetic compatibility |
| EA | Earthing ring |
| SKS | Spiral kink protection |
| GWDR | Thread sealing ring or flat gasket |

## Cable glands – Plastic – IP68

Cable gland made of plastic with integrated strain relief for industrial applications where IP67 or IP68 protection is required. Tested and approved according to EN 62444 and UL514B.



## Technical data

| | |
|---|---|
| Material / Colour | Polyamide 6 / Light Grey / RAL 7035 |
| Seal insert | CR |
| Temperature range | -40 °C...100 °C |
| Protection class | IP67, IP68 - 5 bar (30 min.) |
| Flammability rating | V-2 |
| **Note** | Version with moulded sealing lip.<br>Length L varies depending on the cable diameter used. |

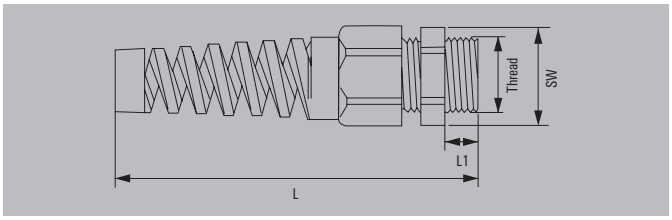
## Cable glands – Plastic – SKS

Cable gland made of plastic with spiral bending protection and integrated strain relief, specially suited for moving connections. It prevents cables from bending at acute angles.



### Technical data

| | |
|---|---|
| Material / Colour | Polyamide 6 / Light Grey / RAL 7035 |
| Seal insert | CR |
| Temperature range | -20 °C...100 °C |
| Protection class | IP68 - 5 bar (30 min.) |
| Flammability rating | V-2 |
| **Note** | Version with moulded sealing lip<br>Length L varies depending on the cable diameter used. |

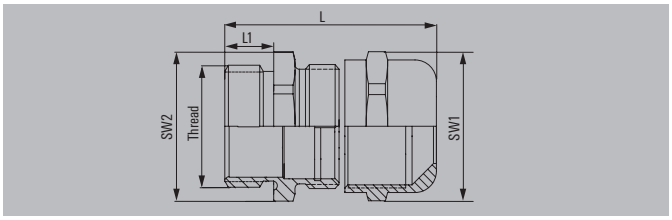
## Cable glands – Brass – IP68

Cable gland made of brass for industrial applications where IP68 or IP69K protection is required.



### Technical data

| | |
|---|---|
| Material | Brass, nickel-plated |
| O-ring / Seal insert | NBR / CR |
| Temperature range | -40 °C...100 °C |
| Clamp insert | Polyamide |
| Protection degree with GWDR | IP54, IP66, IP67, IP68 - 5 bar (30 min.), IP69K |
| **Note** | Length "L" varies depending on the cable diameter used; IP69K protection applies to all metric cable glands; the following thread sizes are excluded from IP69K: PG29, PG36, PG42 and PG48. |

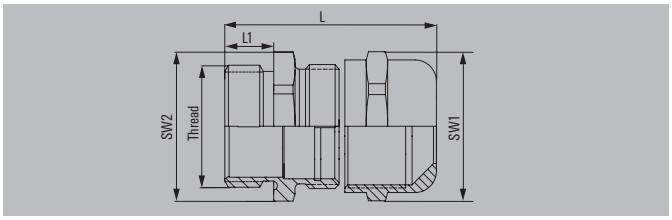
## Cable glands – Brass – IP68

EN 45545

Cable gland made of brass with spherical sealing insert which squeezes the cable gently over a large area. This cable gland is suitable for railway applications; its sealing material conforms to the requirements of EN 45545.



### Technical data

| | |
|---|---|
| Material | Brass, nickel-plated |
| O-Ring / Seal insert | NBR / T80s |
| Temperature range | -40 °C ... 130 °C |
| Protection class | IP68 - 15 bar |
| **Note** | |

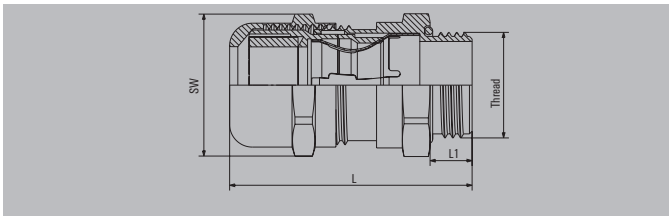
## Cable glands – Brass – EMC–4

Cable gland made of brass with EMC contact system for the particularly time-saving installation of shielded cables. It is characterised by the following features: very low installation effort, vibration-resistant and patented active contact system.



### Technical data

| | |
|---|---|
| Material | Brass, nickel-plated |
| O-Ring / Seal insert | NBR / CR |
| Temperature range | -40 °C...100 °C |
| Protection class | IP66, IP68 - 5 bar (30 min.), IP69K |

# Our expertise for your requirements
## Service connects – worldwide

Automation technology functions are becoming more complex in a globally-oriented world facing ambitious targets in terms of energy efficiency and smart production. We are your equal partners for the best connections in Industrial Connectivity.

Our personal support answers all questions reliably and expertly. During planning, installation or operation our service and support offer is your best companion.

In short: Weidmüller's global service combines our expertise with your requirements.

**Your way to our service**
www.weidmueller.com/service

# Engineering services and customised products

Automation engineering and connectivity consulting belongs to our services as well as assembly of engineered products. We also support the process from the idea to the product with our Weidmüller Configurator and the Configure-to-Order process.

**Consulting and engineering**
The challenge for you is reducing costs and increasing efficiency. This requires intelligent, individual solutions. Whether it is modified products, pre-fitted mounting rails or complete small cabinets – our application centres provide a highly qualified custom-made engineering and production service.

**Connectivity Consulting**
Increase your competitiveness - supported by our experts
Our drive is to optimise your competitiveness. That's why our team of experts supports you in significantly increasing your efficiency in electrical machine design and control cabinet construction. With proven products and services from the Weidmüller portfolio – and with the experience gained from over 300 projects worldwide.

**Assembled terminal rails - Flexibly designed to suit your requirements**
Your processes in panel building have to be fast, flexible and productive. This is the only way you can cut your costs and increase efficiency. Depending on the application in question, you will have different requirements with respect to the engineering service, delivery speed and flexibility to be provided.

**Modified and assembled enclosures - Competitive advantages included**
To compete internationally, your plants need to satisfy high standards of safety, quality and performance. The smart combination of consultation, application expertise and industry know-how is our key to finding a custom-fit solution for your application. Reduce costs and increase efficiency.

**Fast Delivery Service - Your ideas deserve a quick realisation**
Obtain offers 24/7 and within minutes, including directly orderable article numbers with our Fast Delivery Service. The Weidmüller Configurator (WMC) for planning and configuration is key for consistent processes. Dispatch your orders in 5 days. Assemble individual terminal strips and enclosures from batch size 1!

# Your ticket to the world of digital service
## easyConnect – Your Industrial Service Platform

Our cloud-based platform is your ticket to the world of digital services from Weidmüller, and the intuitive and future-proof tool for your way to the Industrial IoT. Realise your use cases easily, consistently and without any relevant prior knowledge, thanks to the perfect interaction of platform, devices and diverse software services.

As an open, modular and perfectly integrable system, the platform is your enabler for a wide range of use cases. Increase your efficiency and unleash your full innovation potential with easyConnect.

**Interested in using easyConnect?**
Learn how to get started with easyConnect step-by-step.

www.weidmueller.com/easyconnect

## Why should you use easyConnect?

- You want to enter your digital transformation step-by-step?
- You want to make the step into Industrial IOT, but have no or little IT expertise?
- You want to use your digital data for smart & scalable services?
- You want to offer digital services (such as customised dashboard) to your customers?
- You want to improve your service offering and efficiency, e.g. through remote access?
- You feel Weidmüller's digital services are interesting, but you have „your cloud" already?

Weidmüller comes up with the solution: easyConnect, the new digitalisation platform. It bundles Weidmüller's digital services at one place in the cloud and connects them with various Weidmüller devices.

With easyConnect you start digitalising your application step-by-step without ballast in a secure way.

## The following services are initially available on easyConnect:

**Device management**
Adding and managing cloud-connected devices is typically the first step in any Industrial IoT use case.

**Asset management**
The asset management service is a modelling tool that allows users to model their assets and processes and link them to relevant time series data.

**Remote access (u-link)**
u-link guarantees a quick and secure access to machines and plants while also allowing for efficient management.

**Data visualisation**
easyConnect data visualisation services enable users to view, monitor and display live and historical data.

**AutoML**
With Weidmüller Industrial AutoML, you can optimize operations, increase product quality and develop new business models by benefiting from advanced analytics.

# Expand the possibilities of our products

## Our Support Center provides you with comprehensive, clear and personal assistance

Receive fast and intuitive support to get the most out of our products in your application. In our new Support Center you can search or navigate to the many application notes, product information, video tutorials or software downloads of our products.

- **Everything at a glance –** One central support hub, where all relevant information is available
- **Powerful search –** Provides filter functions for various types of information and products
- **Different views and navigations –** Content provided in views product information, engineering support or software downloads
- **More than 170,000 downloads –** Application notes, video tutorials, templates and examples, user documentation, engineering data, ...
- **Personal contact –** Direct access to your personal technical contact in your country

**Explore the world of our new Support Center**
support.weidmueller.com

# Additional support services

**Training and Webinars**
Stay tuned in a world that is accelerating. In our entertaining interactive webinars, we offer you the opportunity to learn about new products and technology topics and to interact with our experts.

**Repairs and replacement parts**
We offer repair and components for our Workplace Solutions as well as assistance for other Weidmüller products. Find out how our experts can help you with your repair request.

**Security advisory board**
Our Product Security Incident Response Team (PSIRT) continuously informs you about possible security-related vulnerabilities of our products.

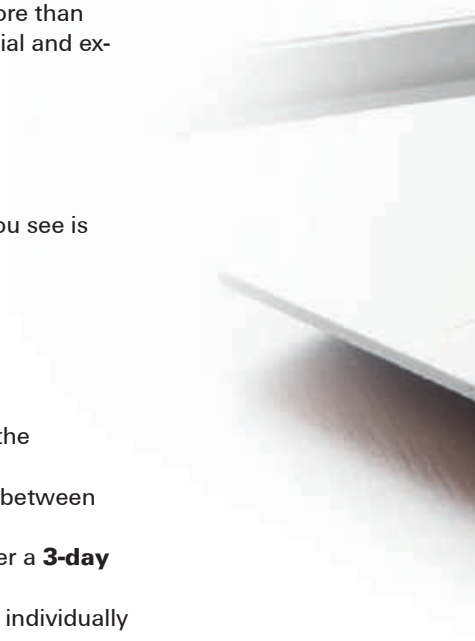
**Engineering data**
For the quick integration of our products into your design, there are a lot of digital product data for engineering systems like EPLAN, Zuken E3.series, WSCAD and many others available for download.

**Product change notifications**
Technical modifications of our products always available online.

**Technical product catalogues**
Technical data for our entire program in Industrial Connectivity for download in PDF-format.

# From the idea to the finished solution

## Weidmüller Configurator: intuitive, uncomplicated & fast digital engineering



Digital engineering can be so easy – with the Weidmüller Configurator!

It´s a **free to use** software application to easily configure industrial solutions. It features more than **12,000 articles** from multiple product families including rail-mounted components, industrial and ex-certified enclosures, Heavy Duty Connectors, remote I/O-systems and PCB connectors.

Unleash the full power of digital engineering:

Our application wizards help you choose the right articles.
Place, mark or modify them to your needs and get your solution **visualized in 3D –** what you see is what you get!

Our promise: Speed up your solution planning process by up to 70%!

**Your benefits:**

- **Proven configuration designs in real 3D:** The plausibility and collision check with the complete digital documentation ensures that you can rely 100% on your configuration.
- **Seamless E-CAD Roundtrip:** Interfaces enable the simple exchange of product data between the WMC and all common engineering tools, such as Zuken E3 or EPLAN Electric P8.
- **Sample Service & Fast Delivery Service:** to support your design-in process, we offer a **3-day sample service** for many products. Inquire them directly online – for free!
  You want your solution right away? Our **Fast Delivery Service** guarantees delivery of individually assembled terminal strips or enclosures within a few days.

**Get started online now!**

The Weidmüller Configurator makes solution planning easy. Visit our website for more information, tutorials and download it for free:

**www.weidmueller.com/wmc**

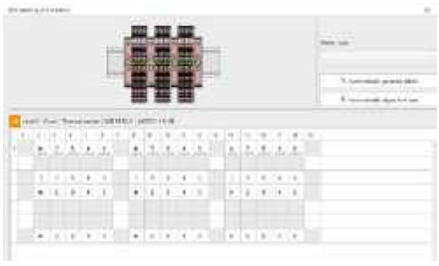
or register on **easyconnect.weidmueller.com**
and use it online.

WMC

E3 series

ePLAN electric P8

**Wizards:**
Design complete applications within few clicks – even without detailed product knowledge – for signal wiring, load monitoring, instrument transformers, enclosures, remote I/O-systems and many more.



**Assistants:**
Finalize your solutions with supporting assistants to add cross-connectors, markers or colors and verify the faultlessness. Automatic modes save valuable time!

**1-click documentation:**
Get assembly drawings for production – only 1 click. Bill of material – only 1 click. The complete solution documentation including all component data sheets – you´re right, only 1 click!

We cannot guarantee that there are no mistakes in the publications or software provided by us to the customer for the purpose of making orders. We try our best to quickly correct errors in our printed media.

All orders are based on our general terms of delivery, which can be reviewed on the websites of our group companies where you place your order. On demand we can also send the general terms of delivery to you.

**Weidmüller – Your partner in Industrial Connectivity**

As experienced experts we support our customers and partners around the world with products, solutions and services in the industrial environment of power, signal and data. We are at home in their industries and markets and know the technological challenges of tomorrow. We are therefore continuously developing innovative, sustainable and useful solutions for their individual needs. Together we set standards in Industrial Connectivity.
